This title deals with the experiences of the American soldiers who fought the Japanese across the Pacific islands, and the specific nature of this combat environment. It follows a hypothetical soldier, 'Michael', through his enlistment into and training with the 165th Infantry Regiment (New York National Guard). It takes him through the 1941 maneuvers the 27th Infantry Division participated in, the transfer to Oahu, and into the reality of daily life and combat in the Pacific theater from 1942 to 1945, including Makin, Saipan and Okinawa. It also looks at the PTO administrative procedures for replacements, and medical and psychiatric care of the ordinary soldier. Whilst the focus is on one individual, the experiences of the many are examined and woven into an intricate and meticulous narrative.

Microelectromechanical system (MEMS) inertial sensors have become ubiquitous in modern society. Built into mobile telephones, gaming consoles, virtual reality headsets, we use such sensors on a daily basis. They also have applications in medical therapy devices, motion-capture filming, traffic monitoring systems, and drones. While providing accurate measurements over short time scales, this diminishes over longer periods. To date, this problem has been resolved by combining them with additional sensors and models. This adds both expense and size to the devices. This tutorial focuses on the signal processing aspects of position and orientation estimation using inertial sensors. It discusses different modelling choices and a selected number of important algorithms that engineers can use to select the best options for their designs. The algorithms include optimization-based smoothing and filtering as well as computationally cheaper extended Kalman filter and complementary filter implementations. Engineers, researchers, and students deploying MEMS inertial sensors will find that this tutorial is an essential monograph on how to optimize their designs.

These proceedings contain research papers presented at the 5th International Conference on Dynamics in Logistics, held in Bremen, Germany, February 2016. The conference is concerned with dynamic aspects of logistic processes and networks. The spectrum of topics reaches from modeling, planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber-physical production and logistic systems. The growing dynamic confronts the area of logistics with completely new challenges: it must become possible to describe, identify and analyze the process changes. Moreover, logistic processes and networks must be redevised to be rapidly and flexibly adaptable to continuously changing conditions. The book primarily addresses researchers and practitioners from the field of industrial engineering and logistics, but it may also be beneficial for graduate students.

This book describes different methods that are relevant to the development and testing of control algorithms for advanced driver assistance systems (ADAS) and automated driving functions (ADF). These control algorithms need to respond safely, reliably and optimally in varying operating conditions. Also, vehicles have to comply with safety and emission legislation. The text describes how such control algorithms can be developed, tested and verified for use in real-world driving situations. Owing to the complex interaction of vehicles with the environment and different traffic participants, an almost infinite number of possible scenarios and situations that need to be considered may exist. The book explains new methods to address this complexity, with reference to human interaction modelling, various theoretical approaches to the definition of real-world scenarios, and with practically-oriented examples and contributions, to ensure efficient development and testing of ADAS and ADF. Control Strategies for Advanced Driver Assistance Systems and Autonomous Driving Functions is a collection of articles by international experts in the field representing theoretical and application-based points of view. As such, the methods and examples demonstrated in the book will be a valuable source of information for academic and industrial researchers, as well as for automotive companies and suppliers.

Emilie Day believes in playing it safe: she’s homeschooled, her best friend is her seizure dog, and she’s probably the only girl on the Outer Banks of North Carolina who can’t swim. Then Emilie’s mom enrolls her in public school, and Emilie goes from studying at home in her pj’s to halls full of strangers. To make matters worse, Emilie is paired with starting point guard Chatham York for a major research project on Emily Dickinson. She should be ecstatic when Chatham shows interest, but she has a problem. She hasn’t told anyone about her epilepsy. Emilie lives in fear her recently adjusted meds will fail and she’ll seize at school. Eventually, the worst happens, and she must decide whether to withdraw to safety or follow a dead poet’s advice and “dwell in possibility.” From Golden Heart award-winning author McCall Hoyle comes The Thing with Feathers, a story of overcoming fears, forging new friendships, and finding a first love, perfect for fans of Jennifer Niven, Robyn Schneider, and Sharon M. Draper.

Today, alcohol and other drug abuse scientists have access to a broad array of clinical resources that integrate a commonsensical approach to addiction treatment with science. Addictions: A Comprehensive Guidebook is a superb example of one such resource. Here, in one volume, is both practical and scholarly information for alcohol and drug abuse specialists, primary care providers, clinicians, policy-makers, and others involved in programs that are geared to help those who abuse or are dependent on alcohol and other drugs. Its scope is a testament to how far drug abuse scientists and practitioners have come in defining what they do and to how they are able to do it effectively through a growing body of scientific behavioral research. Addictions is organized into seven parts that range from the prevalence of certain addictions to their identification and treatment to the social effects of these addictions. In fact, this volume contains nearly all of the basic information a professional or graduate student needs to learn about or treat substance abuse.

Examples highlight the latest processor designs, benchmarking standards, languages and tools. As with previous editions, a MIPs processor is the core used to present the fundamentals of hardware technologies at work in a computer system. The book presents an entire MIPS instruction set—instruction by instruction—the fundamentals of assembly language, computer arithmetic, pipelining, memory hierarchies and I/O. A new aspect of the third edition is the explicit connection between program performance and CPU performance. The authors show how hardware and software components--such as the specific algorithm, programming language, compiler, ISA and processor implementation--impact program performance. Throughout the book a new feature focusing on program performance describes how to search for bottlenecks and improve performance in various parts of the system. The book digs deeper into the hardware/software interface, presenting a complete view of the function of the programming language and compiler--crucial for understanding computer organization. A CD provides a toolkit of simulators and compilers along with tutorials for using them. For instructor resources click on the grey "companion site" button found on the right side of this page. This new edition represents a major revision. New to this edition: * Entire Text has been updated to reflect new technology * 70% new exercises. * Includes a CD loaded with software, projects and exercises to support courses using a number of tools * A new interior design presents defined terms in the margin for quick reference * A new feature, "Understanding Program Performance" focuses on performance from the programmer's perspective * Two sets of exercises and solutions, "For More Practice" and "In More Depth," are included on the CD * "Check Yourself" questions help students check their understanding of major concepts * "Computers In the Real World" feature illustrates the diversity of uses for information technology *More detail below

Android Phones for Seniors in easy steps, 2nd edition

The Thing with Feathers

Die Mobilisierung unserer Gesellschaft trifft auf zahlreiche Entwicklungsprojekte mobiler Applikationen, die zunächst enthusiastisch begonnen wurden, letztlich aber gescheitert sind. Am Beispiel des Mobile Learning stellt Philipp Maske in diesem zweibändigen Werk heraus, dass Entwicklungsprozesse mobiler Applikationen von einem bisher unerforschten interdisziplinären Wirknetzwerk der Dimensionen Ökonomie, Technologie und Didaktik beeinflusst werden. Basierend auf diesem Wirknetzwerk wird ein Vorgehensmodell als Instrument der gestaltungsorientierten Wirtschaft konstruiert, dessen Nützlichkeit anhand einer Fallstudienimplementierung bewertet wird.

Sensors for Health Monitoring

Stellen Sie sich vor, jemand ruft Sie der Panik nah an und bittet Sie: Sie m ssen mir helfen, mein Handy ist schwarz." Sie wissen nicht, wo das Problem liegt und was ausgerechnet Sie tun k nnen? Dann geht es Ihnen f r einen kurzen Moment wie unz hligen Mitarbeitern an den Servicetelefonen der deutschen Mobilfunkanbieter. Gut f r Sie, dass Sie nicht daf r bezahlt werden, nun herausfinden zu m ssen, was der Anrufer will. Doch mit solchen oder hnlichen, absolut nicht pr zisen Fehlerbildern melden sich t glich tausende und abertausende von Kunden an den Hotlines ihrer Provider. Sie reklamieren absolut korrekte Rechnungen, unterstellen dem Internet unbefugtes Betreten ihres Handys oder besitzen wundersame Passw rter, die sich ganz von selbst ndern. Damit ist das Ende der sprichw rtlichen Fahnenstange aber noch lange nicht erreicht: diese Kunden formulieren Ihr Anliegen so, dass ein Normalmensch die gesprochenen W rter vernimmt, die meisten davon wiedererkennt, doch oft nicht in der Lage ist, aus dem Gebrabbel einen Sinn zu erkennen. Als Telefonist glaubt man manchmal, dass diese Ausgeburten der H lle nur anrufen, um einen in den Wahnsinn zu treiben und oft hat man den Eindruck, dass sich Handystrahlung doch irgendwie negativ auf die Gehirnfunktionen auswirkt. Unz hlige tats chlich erlebte F lle spiegeln die Arbeit bei PHONE*4*ALL, einem fiktiven Mobilfunkanbieter, in lustigen Episoden wieder. Es sind Geschichten, die so abstrus sind, dass sie sich niemand ausdenken k nnte. Diese irrwitzigen Stories erblickten das Tageslicht, weil Handybesitzer ohne zu z gern - und ohne zu berlegen - zu ihrem geliebten Mobiltelefon greifen und beim kleinsten Problem die Kurzwahl ihres Mobilfunkanbieters w hlen. Wozu das eigene Gehirn benutzen, wenn das doch die Person am anderen Ende der Strippe machen kann? Ein Blick hinter die Kulissen von PHONE*4*ALL zeigt, dass die armen Call-Center-Agenten zwar ihr M glichstes tun, um allen Kunden zu helfen, doch manchmal nur ein Zauberstab o

E-Books in Academic Libraries: Stepping Up to the Challenge provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books.Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences.Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.
