Reports of Investigations - Illinois State Museum

Most of us watch with mild concern the fast disappearing wild spaces or the recurrence of pollution - related crises such as oil spills, toxic blooms in fertilizer-enriched rivers, and the increasing violence in our own country. Joy Williams does much more than watch. With guts and passion, she sounds the alarm over the general disconnection from the natural world that our consumer culture has created. The culling of elephants, electron-probed chimpanzees, and the vanishing wetlands are just some of her subjects. Razor-sharp, controversial, scathingly opinionated, and refreshingly unafraid of conflict, Williams refuses to compromise as she lashes out at the greed of Americans and decries our own turpitude. It is not enough to mourn the passing of the natural world, Ill Nature shouts. Get out of our homes and our cars and our cubicles and do somethingnow.

Colour is a powerful selling tool. It is the first thing to catch the consumer's eye in the shop window. Get the colour choice wrong and an entire range can stay on the racks. So, how do colours arrive on the catwalk or the sales floor – and why do different companies all seem to choose similar colours each season? The answer lies in the work of the huge colour forecasting industry. With case studies that show the industry at work, this book breaks down the forecasting process – from how to put together a colour palette to colour theory and the way that colours behave – and helps you to build the combination of research and intuitive skills that a successful designer or forecaster needs.

The tide of 'Europe of the Regions' rhetoric that dominated much political discussion and thinking in the 1980s and 1990s has gradually ebbed. Governance in Europe today may be characterized as 'multi-level', but the nation state remains the dominant level for many purposes. Are Europe's regions, and European regionalism, therefore of little b6s and diminishing b6s consequence? This book addresses this question by examining the experiences of regions and regionalism across western, central and eastern Europe. A team of leading country specialists presents analyses of both the larger states of Europe and many of their smaller counterparts, updated to include the impact of the EU enlargements of 2004 and 2007. The conclusions of this book are that there is a growing diversity of European regions, and a wide variety of regionalizing imperatives. Regionalism may not have overthrown the nation state, but Europe's regions, and European regionalism, have a persisting importance to the politics of the continent.

TV Guide

My purpose in writing this book is to take you through the concluding stages of an amazing television show: "The X-Files." Consider this book to be a guide through the final four seasons of "The X-Files." Along the way, you will hear from some of the people who made the key story decisions on the series as well as thoughts and comments from many of the show's fans, whose passion for "The X-Files" made it such a resounding success. You will see how the show affected them positively and negatively. You will get an in-depth look at how the series, its two main characters and their fascinating relationship evolved after moving from Vancouver to Los Angeles. The good, the bad and the ugly. This book will bring it all to you - and much, much more. At the book's core will be my episode reviews and essays. They are just the thoughts of one fan, but it is my hope they will strike a chord with each of you and serve as a written testimony of the powerful emotional resonance this wonderful series had on all those it touched. For nine seasons, "The X-Files" provided thrills and drama unlike anything I had ever seen on television before. I doubt another show will come along that will be its equal and it will be the rare series which will inspire the type of devotion from its viewers this show enjoyed. It was an amazing ride, ones which began with such promise and ended with so much uncertainty. I hope you enjoy the ride as much as I did.

The history of the American electorate is not a litany of flukes; instead it is a pattern of tectonic plate-grinding, punctuated by a landscape-altering earthquake every generation or so. Donald Trump's electoral coalition is smashing both American political parties and its previously impenetrable political news media. The political experts called the 2016 election wrong and in the wake of the 2016 election surprise, the experts have continued to blow it - looking to predict the coming demise of the President without pausing to consider the durability of the trends and winds that swept him into office. The Great Revolt delves deep into the minds and hearts of the voters the make up this coalition. What emerges is a group of citizens who cannot be described by terms like "angry," "male," "rural," or the often-used "racist." They span job descriptions, income brackets, education levels, and party allegiances. What unites them is their desire to be part of a movement larger than themselves that puts pragmatism before ideology, localism before globalism, and demands the respect it deserve from Washington. Zito and Todd have traveled on over 27,000 miles of country roads to interview more than 300 Trump voters in 10 swing counties. What they have discovered is that these voters were hiding in plain sight--ignored by both parties, the media, and the political experts all at once, ready to unite into the movement that spawned the greatest upset in recent electoral history. Deeply rooted in the culture of these Midwestern swing states, Zito and Brad Todd reframe the discussion of the "Trump voter" to answer the question- What next?

"I would give myself an A+" —Donald Trump, on his first 100 days in office. Americans increasingly agree on one thing: Every day that Trump stays in office, he diminishes the United States and its people. In *Trump Must Go*, TV and radio host Bill Press offers 100 reasons why Trump needs to be removed from office, whether by impeachment, the 25th Amendment, or the ballot box. Beginning with the man himself and moving through Trump's executive action damage, Press covers Trump's debasement of the United States political system and degrading of the American presidency. Ranging from banning federal employees' use of the phrase "climate change," to putting down Haiti, El Salvador, and African nations as "shithole" countries, we have to wonder what he'll do next. He has a bromance with Putin that enables several meetings between Trump staffers and Russian officials, and he has a wrecking crew administration: Attorney General Jeff Sessions, Education Secretary Betsy DeVos, and Housing Secretary Ben Carson, to name a few. Extensive "executive time" marks Trump's calendar so he can golf, watch TV, and eat fast food. Trump has done it allbadly. But, in a political climate where the world has learned to expect the unexpected, Press offers readers a twist: one reason not to ditch Donald Trump.
