The Theory Books of the DAVID CARR GLOVER PIANO LIBRARY are written in "programed instruction" style, one of the most effective means of learning in modern education. Programed instruction is based on three generally accepted principles: 1. The material is presented in small steps called "frames." 2. The student makes an immediate written response to each frame so that his learning is constantly checked. 3. The student knows if his answer is correct. The Theory Books are written for the Preparatory Age piano student. However, the fundamentals of music are presented in a logical order making the books useful for any beginner. The Theory books are correlated to the DAVID CARR GLOVER PIANO

LIBRARY, but can be used with any course on music of this level of advancement.

A Harvard psychologist explains how our once-helpful instincts get hijacked in our garish modern world. Our instincts—for food, sex, or territorial protection— evolved for life on the savannahs 10,000 years ago, not in today’s world of densely populated cities, technological innovations, and pollution. We now have access to a glut of larger-than-life objects, from candy to pornography to atomic weapons—that gratify these gut instincts with often-dangerous results. Animal biologists coined the term “supernormal stimuli” to describe imitations that appeal to primitive instincts and exert a stronger pull than real things, such as soccer balls that geese prefer over eggs. Evolutionary psychologist Deirdre Barrett applies this concept to the alarming disconnect between human instinct and our created environment, demonstrating how supernormal stimuli are a major cause of today’s most pressing problems, including obesity and war. However, Barrett does more than show how unfettered instincts fuel dangerous excesses. She also reminds us

that by exercising self-control we can rein them in, potentially saving ourselves and civilization.

When rejection comes back to bite you Jordan's life sucks. Her boyfriend, Michael, dumped her, slept his way through half the student body, and then killed himself. But now, somehow, he appears at her window every night, begging her to let him in. Jordan can't understand why he wants her, but she feels her resistance wearing down. After all, her life -- once a broken record of boring parties, meaningless hookups, and friends she couldn't relate to -- now consists of her drinking alone in her room as she waits for the sun to go down. Michael needs to be invited in before he can enter. All Jordan has to do is say the words.

Living the dream of the endless vacation “Anyone who has ever dreamed of leaving the city and taking their lives back to nature (and who hasn't?) will find much to contemplate in this warm and hilarious tale of rural misadventure and

small town quirk, even if they have never chased a goat in a bathing suit or called 911 because there were cows in the road. Stimson's voice is endearing: both in its self-deprecation and its rapture, as she sings an only slightly conflicted love song to Vermont.” —Pam Houston, author of *Contents May Have Shifted* “Taking a plunge that wimpier sorts (i.e. most of us) only fantasize about, Ellen Stimson and her family packed up their house in St. Louis and threw themselves into a wildly different life in small-town Vermont. Armed with the passion-and haplessness-of wide-eyed newcomers they rescue goats and adopt chickens, do battle with skunks and bats and falling ice, and, most disastrously, buy a black hole of a general store. Through it all they manage to retain their love for their adopted home as well as one another. This is a tale to which all the cliché words absolutely apply: hilarious, heartwarming, rollicking, and, most of all, rich in the real stuff of life.” —Julia Reed, author of *But Mama Always Put Vodka in Her Sangria!*

### **Reckoning with Markets**

In this spirited sequel to the acclaimed *The Rook*, Myfanwy Thomas returns to clinch an alliance between deadly rivals and avert epic -- and slimy -- supernatural war. When secret organizations are forced to merge after years of enmity and bloodshed, only one person has the fearsome powers---and the bureaucratic finesse---to get the job done. Facing her greatest challenge yet, Rook Myfanwy Thomas must broker a deal between two bitter adversaries: The Checquy---the

centuries-old covert British organization that protects society from supernatural threats, and The Grafters---a centuries-old supernatural threat. But as bizarre attacks sweep London, threatening to sabotage negotiations, old hatreds flare. Surrounded by spies, only the Rook and two women who absolutely hate each other, can seek out the culprits before they trigger a devastating otherworldly war. Stiletto is a novel of preternatural diplomacy, paranoia, and snide remarks, from an author who "adroitly straddles the thin line between fantasy, thriller, and spoof " (Booklist).

The book fully explains the principles contained in the third edition of the Civil Engineering Standard Method of Measurement (CESMM3) and shows how they are implemented in practice. The contractual background to the measurement and valuation of civil engineering works is described in detail, as are the value and use of method-related charges. All aspects of the measurement of civil engineering work, from taking-off to bill preparation are covered; these are illustrated by some twenty-two worked examples containing working drawings and clear handwritten dimension sheets with fully explanatory notes. In addition to being completely revised and reset, the coverage is also extended with a further chapter on the measurement of the renovation of sewers and water mains.

## **Uninvited**

His professional football career over due to a tragic accident, billionaire Kade Harrison takes on the task of solving a mystery for his brother-in-law and friend,

Max Hamilton. Without his former career to fill every minute of the day, Kade's looking for something to challenge him--now that he's lost the career that had meant everything to him. But what starts out as a simple favor soon becomes a whole lot more than he bargained for when the woman he's seeking slips away from him every time he gets close to finding her. When Kade does finally corner her, things start to get even more complicated. Asha Paritala is nothing like he expected, and the female he had tracked down as a favor for Max soon becomes a woman he wants for his very own, a woman who makes protective and highly predatory instincts he didn't know he had flare to life inside him. Kade soon discovers that he wants Asha's total surrender to the desire and passion that vibrates intensely between the two of them, but he also wants her trust, the one thing Asha's history makes it difficult for her to give. Can Kade convince her that some things are worth risking it all? Caught between two worlds, Asha Paritala is homeless, broke and damaged from a life of abuse and neglect. Born of an American mother and an Indian immigrant father, Asha was raised as an Indian woman by a foster family after the death of her natural parents when she was little more than a baby. She's spent her entire life under the control of others until finally breaking free two years earlier, and she's determined to keep her freedom, even if it means she has to struggle to survive. But when she meets Kade Harrison, her resolve is tested. After Kade helps her through a bad situation, she finds herself beginning to trust Kade as she's never trusted a man before. Kade is everything she always thought a man should be, but can she lose herself in him

completely when she knows she's damaged and confused.

### **Civil Engineering Quantities**

Undergraduate economics students begin and end their study of economics with the simple claim that economics is value free. Only in a policy role will values and beliefs enter into economic work; there can be little meaningful dialogue by economists about such personal views and opinions. This view, now well over 200 years old, has been challenged by heterodox thinkers in economics, and philosophers and social scientists outside the discipline all along the way. However, much of the debate in modern times has been narrowly focused on philosophical methodological issues on one hand or theological/sectarian concerns on the other. None of this filters down to the typical undergraduate even in advanced courses on the history of economic thought. This book presents the notion that economic thinking cannot escape value judgments at any level and that this understanding has been the dominant view throughout most of history. It shows how, from ancient times, people who thought about economic matters integrated moral reflection into their thinking. Reflecting on the Enlightenment and the birth of

economics as a science, Halteman and Noell illustrate the process by which values and beliefs were excluded from economics proper. They also appraise the reader with relevant developments over the last half-century which offer promise of re-integrating moral reflection in economic research. With the advent of interdependency concepts and game theory, behavioral economics and the infusion of other social sciences, especially psychology, into economic considerations, the door is once again open to moral reflection. It is a sensitive subject that can be divisive for many and there is little if any assessable literature on the topic at the undergraduate level. One way to approach the subject is to follow the path of the great thinkers of the past and observe how they worked through economic issues from a set of values that was foundational to their thinking. This places moral thinking in a context illuminating the complexity and importance of moral reflection and illustrating its impact on the culture of the times. *Reckoning with Markets* follows this method with a deliberate effort to cast the material in terms that will engage the undergraduate student. A number of vignettes which apply the perspectives of key figures in the history of economic thought to modern values and policy questions are provided.

## **Someone Named Eva**

In the spring of 2013 the cicadas in the Northeastern United States will yet again emerge from their seventeen-year cycle—the longest gestation period of any animal. Those who experience this great sonic invasion compare their sense of wonder to the arrival of a comet or a solar eclipse. This unending rhythmic cycle is

just one unique example of how the pulse and noise of insects has taught humans the meaning of rhythm, from the whirr of a cricket's wings to this unfathomable and exact seventeen-year beat. In listening to cicadas, as well as other humming, clicking, and thrumming insects, *Bug Music* is the first book to consider the radical notion that we humans got our idea of rhythm, synchronization, and dance from the world of insect sounds that surrounded our species over the millions of years over which we evolved. Completing the trilogy he began with *Why Birds Sing* and *Thousand Mile Song*, David Rothenberg explores a unique part of our relationship with nature and sound—the music of insects that has provided a soundtrack for humanity throughout the history of our species. *Bug Music* continues Rothenberg's in-depth research and spirited writing on the relationship between human and animal music, and it follows him as he explores insect influences in classical and modern music, plays his saxophone with crickets and other insects, and confers with researchers and scientists nationwide. This engaging and thought-provoking book challenges our understanding of our place in nature and our relationship to the creatures surrounding us, and makes a passionate case for the interconnectedness of species.

### **Made for Each Other**

The story of how humanity first came to the Witch World—and almost doomed themselves as they discovered the dangers of their new home. Long ago, after the

Elder People deserted the place known as Witch World, a portal opened from another realm, bringing the people of Hallack to colonize the abandoned lands. But although the old inhabitants had gone, the Old Gods still existed to confound the new mortals beneath them. This is the story of the first ones: Elron the Clanless and Gathea the Wise Woman, who sought their own separate fates in this new mountainous country; Lynne of Garn whose clan ventured into an unknown land of power and was seduced by sinister magic; and Gunnora, the Amber Lady, and her fight against Raidhan, Lady of the Dark Moon. For any fan of the Witch World novels by Science Fiction Writers of America Grand Master Andre Norton, this is the must-have origin story for the adventures that have gripped lovers of sword and sorcery for generations. Horn Crown is the 5th book in the Witch World: High Hallack Cycle, but you may enjoy reading the series in any order.

Popular author F. Belton Joyner has revised his best-selling resource for introducing the United Methodist Church. In a humorous yet respectful style, Joyner takes the reader through illuminating questions and answers on United Methodist terms and beliefs on God, Jesus, the Bible, the church, salvation, and more. Examples of Joyner's questions include "Why did Jesus have to die?" "Who was John Wesley, and who were all those other figures?" "Is the Bible infallible?" "What is The Book of Discipline?" This revised edition includes new sections on United

Methodism as a global church, United Methodist ministries beyond the congregation, and United Methodist theology in conversation with other Christian traditions. It has also been updated to reflect recent changes to The Book of Discipline and the orders of ministry. The book's question-and-answer format easily lends itself to use in Sunday school classes and also works for individual study. From new recruits to lifelong United Methodists, readers will gain a lively sense of what is special and important about their denominational home.

The science behind our attraction and attachment to animals, and how it benefits us: “A fascinating, wide-ranging and easy read.” —New Scientist Nothing turns a baby’s head more quickly than the sight or sound of an animal. This fascination is driven by the ancient chemical forces that first drew humans and animals together. It is also the same biology that transformed wolves into dogs and skittish horses into valiant comrades that would carry us into battle. Made for Each Other is the first book to explain how this chemistry of attraction and attachment flows through—and between—all mammals to create the profound emotional bonds humans and animals still feel today. Drawing on recent discoveries from neuroscience, evolutionary biology, behavioral psychology, and archeology, as well as her own investigations, Meg Daley Olmert explains why the brain chemistry humans and animals trigger in each other also has a profound effect on our mental

and physical well being. This lively and original investigation asks what happens when the bond is severed. If thousands of years of caring for animals infused us with a biology that shaped our hearts and minds, do we dare turn our back on it? Daley Olmert makes a compelling and scientific case for what our hearts have always known, that we were, and always will be, made for each other. “One of those delectably synergistic books that tie together threads of science, history, and everyday life.” —Booklist

### **Exposure**

In conventional views, pastoralism was classified as a stage of civilization that needed to be abolished and transcended in order to reach a higher level of development. In this context, global approaches to modernize a rural society have been ubiquitous phenomena independent of ideological contexts. The 20th century experienced a variety of concepts to settle mobile groups and to transfer their lifestyles to modern perceptions. Permanent settlements are the vivid expression of an ideology-driven approach. Modernization theory captured all walks of life and tried to optimize breeding techniques, pasture utilization, transport and processing concepts. New insights into other aspects of pastoralism such as its role as an adaptive strategy to use marginal resources in remote locations with difficult

access could only be understood as a critique of capitalist and communist concepts of modernization. In recent years a renaissance of modernization theory-led development activities can be observed. Higher inputs from external funding, fencing of pastures and settlement of pastoralists in new townships are the vivid expression of 'modern' pastoralism in urban contexts. The new modernization programme incorporates resettlement and transformation of lifestyles as to be justified by environmental pressure in order to reduce degradation in the age of climate change.

VICTOR HAD REFUSED his bride at the altar! That was the brute fact which agitated the little party in the vestry. No amount of explanation could mitigate it. As best man I had been in a good position to observe events; and even I, who had formerly been fairly intimate with Victor, was completely taken by surprise. True, I had long suspected that there was something queer about him; but up to the very moment of his quietly shattering remark, as he put the ring into his pocket, I had no idea that anything serious was amiss.

Memphis has always been a theatrical town—a crossroads in the center of America for entertainment as well as commerce. Movies are among the many things that travel through the city, both for distribution and exhibition. Thousands of people

who have lived here or just passed through, especially during and after World War II, found their way to the movie theatres. From the vaudeville palaces on Main Street to the nickelodeons on Beale Street, these theatres helped shape the culture of the city. Kemmons Wilson operated movie houses before he built the first Holiday Inn. Several movie theatres played roles in the life of Elvis Presley. W.C. Handy attended the opening of a theatre named for him. Local censorship practices influenced decisions in Hollywood, and the first multiplex in the region was built in Memphis.

### **Stiletto**

Annotation World Bank Living Standards Measurement Study No. 112. Assesses evidence of a negative correlation between the number of children born and levels of child schooling by examining their determinants. In many developing countries, as parents have fewer children, they invest more in the health, education, and welfare of each child. This "quantity-quality tradeoff" is vividly illustrated in the recent economic development of Southeast Asia and Latin America. In Sub-Saharan Africa, however, the existence of such a tradeoff has not been established. The few studies conducted to date reveal either no correlation or a slightly positive one, whereby higher fertility rates are linked to greater schooling per child. This study examines the determinants of fertility and of child schooling in Cote d'Ivoire and Ghana to assess evidence of a tradeoff, using data from three

surveys conducted between 1985 and 1987. The results are mixed. In C te d'Ivoire, there is evidence of such a tradeoff in urban areas but not rural ones. In urban areas, female schooling, higher income, and improved child survival are associated with lower fertility and higher child schooling. In both rural and urban areas of Ghana, there is a tradeoff between fertility and child schooling with higher incomes, and, in rural Ghana, with increases in mothers' schooling. Also available in French ("La relation entre le nombre des enfants et de la scolarisation: Le cas de la C te d'Ivoire et du Ghana"): (ISBN 0-8213-3374-7) Stock No. 13374.
