Handmade Shoes for Men

There's never been a better time to "be prepared." Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live "green" in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. *When Technology Fails* covers the gamut. You'll learn how to start a fire and keep warm if you've been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You'll learn how to find and sterilize water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to

situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach, describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption seriously—When Technology Fails ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

Bespoke Shoemaking

Designing, Cutting and Grading Boot and Shoe Patterns, and Complete Manual for the Stitching Room, by an Expert of Thirty Years

“Covers the fundamentals of shoemaking, including pictures, sidebars with flair and great instructions for techniques. One after another, the approximately 30 patterns

proceed—each one more appealing than the last—from an apple pie-color sandal to a Sante Fe-like desert sunrise moccasin. Templates appended.”—Booklist.
“Excellent book.”—Quick & Easy Crafts.

Boot Making and Mending - Including Repairing, Lasting, and Finishing

The internationally bestselling guide to "mind-reading" by influencing those around you via non-verbal communication, from human psychology expert Henrik Fexeus. How would you like to know what the people around you are thinking? Do you want to network like a pro, persuade your boss to give you that promotion, and finally become the life of every party? Now, with Henrik Fexeus's expertise, you can. The Art of Reading Minds teaches you everything you need to know in order to become an expert at mind-reading. Using psychology-based skills such as non-verbal communication, reading body language, and using psychological influence, Fexeus explains how readers can find out what another person thinks and feels- and consequently control that person's thoughts and beliefs. Short, snappy chapters cover subjects such as contradictory signs and what they mean, how people flirt without even knowing it, benevolent methods of suggestion and undetectable influence, how to plant and trigger emotional states, and how to perform impressive mind-reading party tricks. Fexeus gives readers practical (and often fun) examples of how to effectively mind-read others and use this information, benevolently, both in personal and professional settings.

The knowledge of how to make a shoe pattern was certainly the ancient shoemaker's most closely guarded secret, passed from master to apprentice but never written down. Now, after 20 years of research, the principles for making ancient shoe patterns have been rediscovered. This comprehensive guide to European archaeological footwear is richly illustrated with drawings and photographs of archaeological leather shoe finds and shoe reconstructions. A catalogue presents each named shoe style along with the cutting patterns used, a concise description and a full list of the published examples. The volume also includes a short history of calceological studies, case studies, the fundamental

research methods and an overview of shoe sole/upper constructions for archaeological leather shoes. Marquita Volken uses the practical knowledge and research techniques developed by Olaf Goubitz in combination with the methods established by Carol van Driel-Murray and Willy Groenmann-van Waateringe to identify the 17 basic types of cutting patterns used for archaeological leather footwear. Over 400 named shoe styles are identified and presented within a chronological framework covering Prehistory, the Roman period, the Middle Ages and the early modern times.
