Coleridge and the Nature of Imagination

The Collins College Outline for College Biology is a comprehensive overview of core topics from cell structure to genetic engineering. Chapters on DNA and basic biological chemistry; animal development and major organ systems; plant structure and function; populations and ecosystems; current and controversial issues; and more will provide students with all of the information needed to master a college-level or AP biology course. Fully revised and updated by Dr. Marshall Sundberg, College Biology includes practical "test yourself" sections with answers and complete explanations at the end of each chapter. Also included are essential vocabulary definitions and sample exercises, as well as detailed images, charts, and diagrams. The Collins College Outlines are a completely revised, in-depth series of study guides for all areas of study, including the Humanities, Social Sciences, Mathematics, Science, Language, History, and Business. Featuring the most up-to-date information, each book is written by a seasoned professor in the field and focuses on a simplified and general overview of the subject for college students and, where appropriate, Advanced Placement students. Each Collins College Outline is fully integrated with the major curriculum for its subject and is a perfect supplement for any standard textbook.

Collected Folk Tales

Faced with the ever-accelerating pace of technological change and the restructuring of markets, many firms have been questioning the appropriateness of

their own organizational structure and effectiveness. Consequently, we have witnessed much organizational experimentation and the development of new forms of organizing over the last decade. Firms are more dependent than ever on the need for continuous and radical innovations – and often innovations that go beyond their existing businesses. This challenges firms in terms of knowledge and idea sharing, and often necessitates the need to expand beyond the boundaries of the single firm for multi-party collaboration to meet serious challenges and develop creative solutions. Drawing from the Fourth International Workshop on Organization Design, and featuring contributions from an international array of specialists, this volume focuses on the expansion beyond the boundaries of the single firm and multi-firm networks, to include, for example, community-based organization designs. A community is a connected set of firms; the connections can take on many different dimensions. For organization design theory, community-based organizations have many implications. For one, organization design theory has to identify and describe designs that enhance collaborative behavior among firms without restricting the ability of the individual firm to continue to compete within its own marketplace. Moreover, organization design theory also has to identify and describe information processing strategies and designs that allow the continuous generation, sharing, and application of existing information and knowledge. The development of effective collaborative community designs is critically important to the global economy because, increasingly, our future depends on pursuing shared goals and sustainably developing our global commons. Ideally, the ideas and findings in this book will contribute to increased attention to new organization designs capable of meeting 21st-century opportunities and challenges.

Colin and the Gladiators

'A biography as sensuously satisfying as a fine French meal. Colette surely would have approved it as much for its aesthetic appeal as for its rare insight and scholarship.' Robyn Davidson Colette's France is the remarkable life story of an extraordinary woman, who was known simply as 'Colette'. This lavishly illustrated biography of the French writer, who was as famous for her novels as for her often controversial life, follows her journey through the landscapes of France where she lived and loved - from a childhood in Burgundy and coming of age in the Belle Époque Paris, to Provence and St Tropez. Jane Gilmour recounts the varied lives of a sensual, artistic, rebellious woman who lived life on her own terms, from prodigious writer and journalist, risqué performer, lover and seducer, businesswoman, baroness, mother, and finally, grand old lady of letters. Dr Jane Gilmour is an Australian with a personal passion and extensive knowledge of Colette and her life. Jane lived in France for many years where she studied the writer at the Sorbonne and completed her thesis on the writer there. Jane has continued her passion for her subject frequently returning to France to write this book and to visit the regions where Colette lived, loved and worked.

An accessible look at the hottest topic in physics and the experiments that will transform our understanding of the universe The biggest news in science today is the Large Hadron Collider, the world's largest and most powerful particle-smasher, and the anticipation of finally discovering the Higgs boson particle. But what is the Higgs boson and why is it often referred to as the God Particle? Why are the Higgs and the LHC so important? Getting a handle on the science behind the LHC can be difficult for anyone without an advanced degree in particle physics, but you don't need to go back to school to learn about it. In Collider, award-winning physicist Paul Halpern provides you with the tools you need to understand what the LHC is and what it hopes to discover. Comprehensive, accessible guide to the theory, history, and science behind experimental high-energy physics Explains why particle physics could well be on the verge of some of its greatest breakthroughs, changing what we think we know about quarks, string theory, dark matter, dark energy, and the fundamentals of modern physics Tells you why the theoretical Higgs boson is often referred to as the God particle and how its discovery could change our understanding of the universe Clearly explains why fears that the LHC could create a miniature black hole that could swallow up the Earth amount to a tempest in a very tiny teapot "Best of 2009 Sci-Tech Books (Physics)"-Library Journal "Halpern makes the search for mysterious particles pertinent and exciting by explaining clearly what we don't know about the universe, and offering a hopeful outlook for future research."-Publishers Weekly Includes a new author preface, "The Fate of the Large Hadron Collider and the Future of High-Energy Physics" The world will not come to an end any time soon, but we may learn a lot

more about it in the blink of an eye. Read Collider and find out what, when, and how.

Collaborative virtual environments (CVEs) are multi-user virtual realities which actively support communication and co-operation. This book offers a comprehensive reference volume to the state-of-the-art in the area of design studies in CVEs. It is an excellent mix of contributions from over 25 leading researcher/experts in multiple disciplines from academia and industry, providing up-to-date insight into the current research topics in this field as well as the latest technological advancements and the best working examples. Many of these results and ideas are also applicable to other areas such as CVE for design education. Overall, this book serves as an excellent reference for postgraduate students, researchers and practitioners who need a comprehensive approach to study the design behaviours in CVEs. It is also a useful and informative source of materials for those interested in learning more on using/developing CVEs to support design and design collaboration.

Collaborative Communities of Firms

Traversing the themes of language, terror and representation, this is the first study to engage Coleridge through the sublime, showing him to have a compelling position in an ongoing conversation about finitude. Drawing on close readings of both his poetry and prose, it depicts Coleridge as a thinker of 'the limit' with contemporary force.

Coleridge, Language and the Sublime

Collaboration has become a popular approach to environmental policy, planning, and management. At the urging of citizens, nongovernmental organizations, and industry, government officials at all levels have experimented with collaboration. Yet questions remain about the roles that governments play in collaboration--whether they are constructive and support collaboration, or introduce barriers. This thoughtful book analyzes a series of cases to understand how collaborative processes work and whether government can be an equal partner even as government agencies often formally control decision making and are held accountable for the outcomes. Looking at examples where government has led, encouraged, or followed in collaboration, the authors assess how governmental actors and institutions affected the way issues were defined, the resources available for collaboration, and the organizational processes and structures that were established. Cases include collaborative efforts to manage watersheds, rivers, estuaries, farmland, endangered species habitats, and forests. The authors develop a new theoretical framework and demonstrate that government left a heavy imprint in each of the efforts. The work concludes by discussing the choices and challenges faced by governmental institutions and actors as they try to realize the potential of collaborative environmental management.

Promotions are at the same time beloved and feared by both food retailers and branded goods manufacturers in today's retail environment. Beloved because they attract smart customers and generate an immediate effect on a brand's sale. Feared because there is uncertainty about the competitors' behavior and the actual customer demand leading to high forecast errors. For the retailer, this results in a doom loop of over- or understocking with high inventory costs in the supply chain. Collaboration between retailers and the manufacturer disentangles the doom loop. The thesis reveals the appropriate kind and timing of information and develops a so called Competition Index. Inventory in the supply chain is eliminated and the customer is served better at a lower price. Based on a joint inventory and pricing model and an empirical analysis, it shows that the supply chain efficiency gains from collaborative promotions result in a win for customers, retailers and the manufacturer.

Stephen Baxter's epic sequence of Xeelee novels was introduced to a new generation of readers with his highly successful quartet, *Destiny's Children*, published by Gollancz between 2003 and 2006. But the sequence of novels began with *RAFT* in 1991. From there it built into perhaps the most ambitious fictitious universe ever created. Beginning with the rise and fall of sub-quantum civilisations in the first nano-seconds after the Big Bang and ending with the heat death of the universe billions of years from now the series charts the story of mankind's epic war against the ancient and unknowable alien race the Xeelee. Along the way it examines questions of physics, the nature of reality, the evolution of mankind and its possible future. It looks not just at the morality of war but at the morality of survival and our place in the universe. This is a landmark in SF.

Colette's France

R.S. Thomas (1913-2000) is one of the major poets of the twentieth-century, the greatest Welsh poet since Dylan Thomas, and one of the finest religious poets in the English language. This substantial gathering of his late poems shows us the final flowering of a truly great poet still writing at the height of his powers in his 70s and 80s. It begins with his autobiographical sequence, *The Echoes Return Slow*, unavailable for many years, and also includes, *Counterpoint*, *Mass for Hard Times*, *No Truce With the Furies*, and his final collection, *Residues*.

A Summer In Europe

In 2002 Vernon Scannell wrote the following: 'It has been my firm belief since I first began to attempt the art of poetry that the making of a poem should be, as Yeats asserted, a difficult business. However, I have always felt reservations about what seems to me the only partially true belief, stated by both Eliot and Hopkins in their different ways, that the meaning of a poem is of less significance than its structure and texture, Eliot's 'nice bit of meat for the house-dog.' Ideally the poem should be the perfection of expression of meaning inseparable from the methods by which that expression is achieved. As Paul Valry has said, 'A man is a poet if the difficulties inherent in his art provide him with ideas; he is not a poet if they deprive him of ideas.' That was an important statement, his credo. It can accurately be said that almost every poem in this collected volume bears testimony to it. Although not covering the full span of his career - Scannell didn't die until 2007 and was writing almost literally until the very end - the body of his work is here and how impressive it is. On immaculate display is a conspectus of poems embracing the narrative, lyrical, satirical and contemplative. There are poems of pathos and comedy, intelligence and passion: whatever their form, free verse or rhyming, tenor or subject, they are executed with unflinching craftsmanship. In his obituary of Vernon Scannell, Alan Brownjohn wrote, 'What might have been considered unusual given a colourful, even swashbuckling, personality that spawned innumerable anecdotes, was his fastidious procedure as a poet, his unflinching focus on the age-old themes of love, war and death, his concern for "a real involvement with living experience". Craft and care, and for that matter clarity and accessibility, were unquestionable necessities if you were serious about the art;

students on Scannell's creative writing courses were liable to be sat down, hangover or not, to write a sonnet after breakfast." 'Scannell is one of what appears to be a vanishing breed, a poet of technical accomplishment who understands that poetry, like the other arts, is a craft as well.' Charles Osborne, Sunday Telegraph 'You actually want to go back and revisit the poems many times. Their shrewd structures hold their elements firmly in place and they resonate also with the kind of humanity time is generous to . . . Scannell has earned a place in the tradition of English poetry.' Paul Fussell, Poetry Review ' . . . accurate, humane, humorous, often eloquent and always well-made poems.' Anthony Thwaite, Sunday Telegraph

From the international bestselling author of *Blood Men* comes a gripping new thriller that paints a brutally vivid picture of a killer's mind. People are disappearing in Christchurch. Cooper Riley, a psychology professor, doesn't make it to work one day. Emma Green, one of his students, doesn't make it home. When ex-cop Theodore Tate is released from a four-month prison stint, he's asked by Green's father to help find Emma. After all, Tate was in jail for nearly killing her in a DUI accident the year before, so he owes him. Big time. What neither of them knows is that a former mental patient is holding people prisoner as part of his growing collection of serial killer souvenirs. Now he has acquired the ultimate collector's item—an actual killer. Meanwhile, clues keep pulling Tate back to Grover Hills, the mental institution that closed down three years ago. Very bad things happened there. Those who managed to survive would prefer keeping their memories buried. Tate has no choice but to unearth Grover Hills' dark past if there is any chance of finding Emma Green and Cooper Riley alive. For fans of Dennis Lehane's *Shutter Island*, Thomas Harris' *Silence of the Lambs*, and Jeff Lindsay's *Dexter* series, *Collecting Cooper* is another "relentlessly gripping, deliciously twisted, and shot through with a vein of humor that's as dark as hell" (Mark Billingham) novel by this glimmering new talent in the crime thriller genre.

On her thirtieth birthday, Gwendolyn Reese receives an unexpected present from her widowed Aunt Bea: a grand tour of Europe in the company of Bea's Sudoku and Mahjongg Club. The prospect isn't entirely appealing. But when the gift she is expecting--an engagement ring from her boyfriend--doesn't materialize, Gwen decides to go. At first, Gwen approaches the trip as if it's the math homework she assigns her students, diligently checking monuments off her must-see list. But amid the bougainvillea and stunning vistas of southern Italy, something changes. Gwen begins to live in the moment--skipping down stone staircases in Capri, running her fingers over a glacier in view of the Matterhorn, racing through the Louvre, and taste-testing pastries at a Marseilles cafe. Reveling in every new experience--especially her attraction to a charismatic British physics professor--Gwen discovers that the ancient wonders around her are nothing compared to the renaissance unfolding within. . . Coleridge's Writings: On the Sublime

Following the widely celebrated Collected Poems, this second volume in the series of James Merrill's works brings us Merrill as novelist and playwright. Just as in his poems we come upon prose pieces, dramatic dialogue, and even a short play in verse, in his novels and plays we find the rhythms of his poetry reflected and given new form. Merrill's first novel, *The Seraglio*, is a daring roman à clef derived in large part from his early life as the cosmopolitan son of Charles Merrill, one of America's most famous twentieth-century financiers. Written in a highly refined prose that owes something to Henry James, the book is a compelling portrait of the luxury and treachery swirling around the Southampton beach house of an irrepressible family patriarch, with his many mistresses and ex-mistresses in attendance, told from the point of view of his lively but troubled son. At the other end of the narrative spectrum we find *The (Diblos) Notebook*, an experimental novel in which a young American's adventures on a Greek island are deconstructed and assembled into a tentative fiction before our eyes. Merrill's plays, including the one-act comedy of manners *The Bait* and the Chekhovian *The Immortal Husband*—a reinvention of the myth of Tithonus, who was granted eternal life but not eternal youth—are also fresh turns on his characteristic themes: home and travel, reality and artifice, simplicity and complication. And, for the first time in print, here is Merrill's short play *The Birthday*, a fledgling effort written in 1947 and a fascinating window onto the concern with spiritual communication and the otherworldly that would later blossom into his great epic, *The Changing Light at Sandover*.

This study examines the ways in which the moral community is "talked into being" in relation to crime, and the objects of concern that typically occupy its attention. It maps the imagined moral universe of the virtuous and the criminal and charts the relations between these two groups in the "history of the present." It examines the calls to action which symbolically endow the moral community with power. And it looks at the character and content of collective moralizing. The source materials are commentaries about crime and criminal justice appearing in selected newspapers across the Americas. The moral "talk" found there is stylized, routine, trivial and occasionally dramatic. It looks nothing like the weightier renderings of morality that derive from the reconstruction of a particular "ethic" or from the systematic probing of values and moral reasoning. And its fuzzy, offhand, unexceptional and frequently unsystematic nature makes it a difficult candidate for explaining either stability or change in crime policies. But moral talk has intrinsic

importance as the creator and sustainer of an imagined moral community, a community that symbolizes the existence and vigor of morality itself and confers a crucially important identity on its self-proclaimed members. And moral talk reveals inherent intersections between normative, empirical and technical discourses, highlighting the relationships between morality, science and social engineering. Thus, a prosaic, instrumental, model of morality is particularly strong in North America, but only found in a more abstract form in Latin America, where it sits alongside a stirring vision of morality, more directly anchored in virtue. Research on social problems, moral panics and the sociology of morality has largely overlooked the type of moral discourse studied here. While emphasizing the culturally contingent nature of the findings, the conclusion reflects on their significance for understanding the nature of moralizing, the artifacts of talk and the construction of identity.

Collected Later Poems, 1988-2000

This is the first book of its kind to consider at length Coleridge's relationship to his near contemporary, Friedrich Schiller. Contrary to received opinion, the author shows that Schiller's notion of 'aesthetic education' was indeed valuable to Coleridge at an early stage in his career and that it helped to shape much of his work - from his theory of imagination and his notion of the clerisy to his views on women and his account of historical change. Combining close readings with historical research, this book challenges readers to rethink the radical potential of idealist aesthetics.

Cole Foster had only one wish this Christmas... And that was for Rachel Merriday to realize, finally, that she was in love with him! The only problem was, he and Rachel were friends...just friends. Sure, they kissed that once—and what a kiss!—but Cole was waiting for the right time to tell her how he really felt. But has time run out? Rachel was coming home to Colorado for Christmas with a new man! And from what Cole's been hearing, this guy might just be "the one." How could that be, when it's been so obvious from the moment Rachel first leveled him with a snowball as kids, that it's Cole she should be kissing under the mistletoe! Maybe

now is the right time to finally let Rachel know that all he wants for Christmas...is her.

Collected Poems 1950-1993

Nearly everyone collects something, even those who don't think of themselves as collectors. William Davies King, on the other hand, has devoted decades to collecting nothing—and a lot of it. With *Collections of Nothing*, he takes a hard look at this habitual hoarding to see what truths it can reveal about the impulse to accumulate. Part memoir, part reflection on the mania of acquisition, *Collections of Nothing* begins with the stamp collection that King was given as a boy. In the following years, rather than rarity or pedigree, he found himself searching out the lowly and the lost, the cast-off and the undesired: objects that, merely by gathering and retaining them, he could imbue with meaning, even value. As he relates the story of his burgeoning collections, King also offers a fascinating meditation on the human urge to collect. This wry, funny, even touching appreciation and dissection of the collector's art as seen through the life of a most unusual specimen will appeal to anyone who has ever felt the unappeasable power of that acquisitive fever. "What makes this book, bred of a midlife crisis, extraordinary is the way King weaves his autobiography into the account of his collection, deftly demonstrating that the two stories are essentially one. . . . His hard-won self-awareness gives his disclosures an intensity that will likely resonate with all readers, even those whose collections of nothing contain nothing at all."—*New Yorker* "King's extraordinary book is a memoir served up on the backs of all things he collects. . . . His story starts out sounding odd and singular—who is this guy?—but by the end, you recognize yourself in a lot of what he does."—Julia Keller, *Chicago Tribune*

This new volume demonstrates the extent and diversity of Coleridge's writings on the sublime. It highlights the development of his aesthetic of transcendence from an initial emphasis on the infinite progressiveness of humanity, through a fascination with landscape as half-revealing the infinite forces underlying it, and with literature as producing a similar feeling of the inexpressible, to an increasing emphasis on contemplating the ineffable nature of God, as well as the transcendent power of Reason or spiritual insight.

Collected Short Fiction

Winner of the CCUE Book Prize 2012! Fascinated by his own imagination, Coleridge secretly wrote that its characteristic blend of power and desire made him a "Daemon": a being superstitiously feared as "a something transnatural." Coleridge and the Daemonic Imagination examines this simultaneous experience of exaltation and transgression as a formative principle in Coleridge's poetry and the fabric of his philosophy. In a reading that spans the breadth of Coleridge's achievement, through politics, religion and his relationship with Wordsworth, this book builds to a new interpretation of the poems where Coleridge's daemonic imagination produces its myths: "The Rime of the Ancient Mariner," "Kubla Khan" and "Christabel." Gregory Leadbetter reveals a Coleridge at once more familiar and more strange, in a study that unfolds into an essay on poetry, spirituality, and the drama of human becoming.

A New York Times Editors' Choice Book Spanning almost thirty years and settings that range from big cities to small towns and farmsteads of rural Canada, this magnificent collection brings together twenty-eight stories by a writer of unparalleled wit, generosity, and emotional power. In *A Wilderness Station: Selected Stories, 1968-1994*, Alice Munro makes lives that seem small unfold until they are revealed to be as spacious as prairies and locates the moments of love and betrayal, desire and forgiveness, that change those lives forever. A traveling salesman during the Depression takes his children with him on an impromptu visit to a former girlfriend. A poor girl steels herself to marry a rich fiancé she can't quite manage to love. An abandoned woman tries to choose between the opposing pleasures of seduction and solitude. To read these stories is to succumb to the spell of a true narrative sorcerer, a writer who enchants her readers utterly even as she restores them to their truest selves.
