Our Moon Has Blood Clots is the story of Kashmir, in which hundreds of thousands of Pandits were tortured, killed and forced to leave their homes by Islamist militants, and forced to spend the rest of their lives in exile in their own country. Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the

judgments of one hundred teachers on the English language proficiency of the learners in their classes.
