PowerBuilder 9

Master Qt's Most Powerful APIs, Patterns, and Development Practices Qt has evolved into a remarkably powerful solution for cross-platform desktop, Web, and mobile development. However, even the most experienced Qt programmers only use a fraction of its capabilities. Moreover, practical information about Qt's newest features has been scarce—until now. Advanced Qt Programming shows developers exactly how to take full advantage of Qt 4.5's and Qt 4.6's most valuable new APIs, application patterns, and development practices. Authored by Qt expert Mark Summerfield, this book concentrates on techniques that offer the most power and flexibility with the least added complexity. Summerfield focuses especially on model/view and graphics/view programming, hybrid desktop/Web applications, threading, and applications incorporating media and rich text. Throughout, he presents realistic, downloadable code examples, all tested on Windows, Mac OS X, and Linux using Qt 4.6 (and most tested on Qt 4.5) and designed to anticipate future versions of Qt. The book
Walks through using Qt with WebKit to create innovative hybrid desktop/Internet applications
Shows how to use the Phonon framework to build powerful multimedia applications
Presents state-of-the-art techniques for using model/view table and tree models, QStandardItemModels, delegates, and views, and for creating custom table and tree models, delegates, and views
Explains how to write more effective threaded programs with the QtConcurrent module and with the QThread class
Includes detailed coverage of creating rich text editors and documents
Thoroughly covers graphics/view programming: architecture, windows, widgets, layouts, scenes, and more
Introduces Qt 4.6's powerful animation and state machine frameworks

PowerBuilder 9

Awesome design all across the front of a blank lined 110 page journal. Wonderful for writing, notes, thoughts, ideas or as a gift. The notebook is made with a laminated matte soft cover, which helps to repel liquids and is durable to withstand

any adventure. Each page can handle your ink pens, gel pens, and pencils with no problem! Description: Layout: Lined SIZE: A5 6"x 9" (15.24 x 22.86 cm) Softcover with laminated MATTE finish 110 pages White paper Professionally bound, very affordable in high quality - To view more notebooks, click on the Author page(amazon.com/author/yourjournal) For Guest Books amazon.com/author/yourguestbook -

Advanced Qt Programming

Building Oracle XML Applications

For PowerBuilder, PowerJ and PowerSite developers, the DataWindow object offers remarkable power--and most developers have only scratched the surface of what it can do. Part reference, part tutorial, "The Definitive DataWindow" is a systematic guide covering everything from the basics to the most advanced skills and techniques. The CD-ROM contains all example code, including a complete application, plus a natural language application demo from Elf Software.

The Darkest Angel

IEC 61131-3 gives a comprehensive introduction to the concepts and languages of the new standard used to program industrial control systems. A summary of the special programming requirements and the corresponding features in the IEC 61131-3 standard make it suitable for students as well as PLC experts. The material is presented in an easy-to-understand form using numerous examples, illustrations, and summary tables. There is also a purchaser's guide and a CD-ROM containing two reduced but functional versions of programming systems.

Keep Calm and Let the Health and Safety Engineer Handle It

Presents guidelines on the art of coding with Perl, covering such topics as naming conventions, data and control structures, program decomposition, interface design, and error handling.

The Vampire's Bride

Our Common Future is a joint work produced in 1987 by a United Nations commission headed by former Norwegian Prime Minister, Gro Brundtland. Also known as The Brundtland Report, it offers a classic approach to problem solving by first asking a productive question. How do we protect the world we live in for future generations, while at the same time stimulating economic and social development right now? The solution the work proposes is "sustainable development", defined in the report as humanity's ability "to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs." The key conclusion the report came to - that we need long-term strategies to manage the earth's natural resources - proved to be so universally welcomed it introduced the term "sustainability" into the everyday language of international politics. Solving the problem of workable sustainable development became a hot

topic, leading to the birth of a new academic discipline, environmental economics. The book offered a solution to the problem of ensuring sustainable development by highlighting the critical importance of international cooperation.

MCSA 70-410 Cert Guide R2

Looking for a Perfect Gift or a Journal under \$10 Grab this Blank Lined professional jobs, hobby, passion or part time, Journal, Notebook, Diary as Gifts For Husbands, Wives, Boyfriends, Girlfriends, lovers, fiance, fiancee, family members, best friends, coworkers and family members etc. The most awesome gifts are both personal and useful and that's why a journal is always a fabulous gift! Then, Grab this Awesome Journal Now! It is an 'easy-to-carry' 6 x 9 blank lined journal. It includes: Matte finish cover 110 durable pages White paper Strong Binding 6 x 9 inches If you are looking for a different book, don't forget to click the author's / publisher's name for other great journal ideas. Book Specifics: This Awesome Journal / Notebook is 108-page Blank Lined Writing Journal for the person you love most. It Makes an Excellent Gift for Appreciation or Promotion, (6 x 9 Inches / Matte Finish) Advantages of Writing Journals: Studies have shown that writing journals can boost your creativity and enhance your memory and do your intelligence a world of good. It lets your creative juices flowing and you can brainstorm innumerable ideas in no time not only improve your discipline but can also improve your productivity. Many successful players journal daily. Next time you fall short of this journal will help you reminding them at the tip of your fingers. You can use this journal as: Gratitude journal Collection journal Bucket list journal Quote book journal Scrapbook and memory journal Logbook diary and many more Other Uses of Writing Journals: Other uses of this cute notebook come journal can be simply writing down positive thoughts and affirmations, or your listing down in the night before going to bed, the things to be done the next day. You can then read out these instructions after getting up and your day is all set to goal-driven mode. Hit the BUY NOW Button and start your Magical Journey today! All the Best! *** Please Check out other Journals by clicking the Author's/Publisher's Name under the title.***

Annotation Advanced guide to distributed applications using PowerBuilder 9. This book addresses development Web and Intranet-based systems, including Web Services, Portals, Application-Servers, XML, and Mobile Access. Content provides

both specific implementation techniques and architectural patterns for distributed application development. PowerBuilder 9, to be released Q4 2002, introduces many highly-anticipated distributed development features including support for Web Services and Java application servers. Version 9 of PowerBuilder introduces many features designed specifically to blend the traditional strength of PowerBuilder as a rapid Client/Server application development tool with the new emerging models for distributed application development. PowerBuilder developers need PowerBuilder-specific information on interacting with Java application servers, such as WebSphere, WebLogic, and Sybases Enterprise Application Server (EAServer), and Web Service development. This book presents the new capabilities of PowerBuilder 9 along with the architecture and patterns required to create distributed systems in PowerBuilder. William Green and his team of writers are among the most prominent members of the Sybase community, having helped found TeamSybase in 1994. They have written and served on the advisory boards for every major PowerBuilder publication and have authored three books -- PowerBuilder 5 Object-Oriented Design and Development, PowerBuilder Foundation Class (PFC), and Secrets of the PowerBuilder Masters. They respond to several hundred newsgroups and listserv postings daily. They are active consultants implementing PowerBuilder-based solutions and serve on key community advisory panels within Sybase.

Perl Best Practices

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

PowerBuilder 6

Handbook of Industrial Engineering

"A very clear and engaging introduction to a contemporary analysis of 'race' and racism(s). This text effectively combines key theoretical perspectives with vivid contemporary examples." - Dr Rebecca Barnes, University of Derby "Fantastic book for helping students get past the stuntedness of the term 'racism' to understand the way in which racisms are part of our social practices and institutions. - Dr Lucy Michael, Hull University "This is a solid text, covering the topic in a thoughtful manner. Studying and teaching racism is a complex issue, and this book is a very good resource." - Dr Sanjay Sharma, Brunel University We hear much about 'race' and 'racism' in public discourse but the terms are frequently used without clear definitions or practical examples of how these phenomena work. Racisms: An Introduction introduces practical methods which enable students to think coherently and sociologically about this complex feature of the global landscape. Steve Garner argues that there is no single monolithic object of analysis but rather a plural set of ideas and practices that result in the introduction of 'race' into social relations. This differs over time and from one place to another. Focussing on the

basics, this book: Defines 'race', 'racism', 'institutional racism' and 'racialization'. Provides examples of how these function in fields like the natural sciences and asylum. Clearly sets out theoretical arguments around collective identities ('race', class, gender, nation, religion). Uses empirical case studies, including some drawn from the author's own fieldwork. Points students toward sources of further web and text based information. Engaging and accessible this book provides a signposted route into key elements of contemporary debates. It is an ideal introduction for undergraduates studying 'race' and ethnicity, social divisions and stratification.

Beginning PL/SQL

This edition has been designed to enhance students' knowledge of quantitative aptitude and equip them with the skills that will enable them to succeed in any competitive examination. It presents concepts in a lucid and unambiguous manner. Each chapter contains definitions and explanations of fundamental principles on all major sections of QA, which are further augmented with illustrative examples to enable students to learn and recall faster. It also includes completely worked-out solutions to a large range of problems along with fully solved previous years' questions from various competitive examinations.

The Amazon's Curse

Struts in Action

He is Layel, king of the vampires, a master seducer no woman can deny. But since a rogue horde of dragons killed his beloved over two centuries ago, Layel has existed only for vengeance...until he meets Delilah. Wary of love, the beautiful Amazon wants nothing to do with the tormented vampire. Yet there's no denying their consuming desire every time he nears her. Neither trusts the other—nor can they survive alone. For in an impossible game of the gods' devising, they've been trapped on an island, about to face the ultimate challenge: surrender to the passion that will bind them forever...or be doomed to an eternity apart.

The NIH record

The new Oracle Application Server offers a wide range of functionality, including Java runtime and development tools, portal development tools, business intelligence, single sign-on identify management, and much more. It's so powerful and complex, in fact, that many people who use the product (or are considering using it) are familiar with only a portion of the entire range of its capabilities. The choices can be overwhelming. Few people grasp how the larger issues--such as the interplay between components or the various architectural choices in the product--play out in the Oracle Application Server. This new guide provides the perfect introduction to the Oracle Application Server for users of any level. Regardless of which of the server's capabilities you use, you'll benefit from this tightly focused, all-in-one technical overview. It's written for anyone who is concerned with using and managing web servers, doing Java development and deployment, using Oracle's own tools--like Forms and Reports, using or developing

for Oracle Portal, or those who use and administer business intelligence, mobile or integration software. Divided into three concise sections, the book covers server basics, core components, and server functionality. The book leads with the history of Oracle Application Server, its architecture, management, standards, and third-party support for languages and tools such as Java, Perl, and HTTP. The next section covers Oracle's web server, containers for Java web caching, and the server's security features. And finally, the book discusses HTML development, Java development, and Oracle development. Although the book refers mainly to Oracle Application Server 10g, the authors also describe features in earlier product releases where necessary, particularly Oracle9i Application Server. More comprehensible than a large reference and more detailed than a primer, the book provides a foundation for understanding and using Oracle Application Server effectively and efficiently. Readers concentrate on the most important issues and components of the server, focusing primarily on principles rather than syntax. Designed to be the ideal first OracleAS book, Oracle Application Server 10g Essentials offers Oracle application developers and administrators everything they need to know about this powerful server.

Oracle Application Server 10g Essentials

This Self-Paced Training Kit is designed to help maximize your performance on 70-647, a required exam for the Microsoft® Certified IT Professional (MCITP): Enterprise Administrator certification.

Forthcoming Books

JDBC is the key Java technology for relational database access. Oracle is arguably the most widely used relational database platform in the world. In this book, Donald Bales brings these two technologies together, and shows you how to leverage the full power of Oracle's implementation of JDBC. You begin by learning the all-important mysteries of establishing database connections. This can be one of the most frustrating areas for programmers new to JDBC, and Donald covers it well with detailed information and examples showing how to make database connections from applications, applets, Servlets, and even from Java programs running within the database itself. Next comes thorough coverage of JDBC's relational SQL features. You'll learn how to issue SQL statements and get results back from the database, how to read and write data from large, streaming data types such as BLOBs, CLOBs, and BFILEs, and you'll learn how to interface with Oracle's other built-in programming language, PL/SQL. If you're taking advantage of the Oracle's relatively new ability to create object tables and column objects based on user-defined datatypes, you'll be pleased with Don's thorough treatment of this subject. Don shows you how to use JPublisher and JDBC to work seamlessly with Oracle database objects from within Java programs. You'll also learn how to access nested tables and arrays using JDBC. Donald concludes the book with a discussion of transaction management, locking, concurrency, and performance--topics that every professional JDBC programmer must be familiar with. If you write Java programs to run against an Oracle database, this book is a must-have.

Notebook

Over a decade ago PowerBuilder introduced the idea of rapid Client/Server application development and, for much of that time, was the leader in both technology and sales in the enterprise development market. Although PowerBuilder has lost significant market share to Visual Basic and Delphi, it still enjoys an intensely loyal developer community of close to 300,000. Version 9 of PowerBuilder continues the tradition of introducing leading-edge technology to these developers. PowerBuilder 9 Client/Server Development zeroes in on the most important aspects of building client/server applications in PowerBuilder, including PBNi (native interface), PFC (foundation classes), and database connectivity.

Thermal Insulation

Computerworld

This text develops a comprehensive theory of programming languages based on type systems and structural operational semantics. Language concepts are precisely defined by their static and dynamic semantics, presenting the essential tools both intuitively and rigorously while relying on only elementary mathematics. These tools are used to analyze and prove properties of languages and provide the framework for combining and comparing language features. The broad range of concepts includes fundamental data types such as sums and products, polymorphic and abstract types, dynamic typing, dynamic dispatch, subtyping and refinement types, symbols and dynamic classification, parallelism and cost semantics, and concurrency and distribution. The methods are directly applicable to language implementation, to the development of logics for reasoning about programs, and to the formal verification language properties such as type safety. This thoroughly revised second edition includes exercises at the end of nearly every chapter and a new chapter on type refinements.

Dr. Dobb's Journal

Beginning PL/SQL is a fast-paced and blissfully short introduction to Oracle's PL/SQL language. PL/SQL is the built-in language that every Oracle developer and database administrator simply must know. The book shows readers how to apply object-oriented PL/SQL to production applications. No other book on PL/SQL does this. It gives the reader practical advice on what works and what doesn't, and advises on the performance tradeoffs between doing work in SQL versus in PL/SQL. This book gets readers up-to-speed on the core of the language without wasting time on esoteric and seldom used syntax.

Computing, Control, Information and Education Engineering

Available for the first time as a standalone digital novella! Winged warrior Lysander has been alive for centuries, and yet he's never known desire—until he meets Bianka. Spawned from the bloodline of his enemy, the beautiful but deadly Harpy is determined to lead the untouched Lysander into temptation. He may try to evade

her attempts, but even the most iron-willed demon assassin can resist for only so long....

This book serves as an introduction to the level design process in Unreal Engine 4. By working with a number of different components within the Unreal Editor, readers will learn to create levels using BSPs, create custom materials, create custom Blueprints complete with events, import objects, create particle effects, create sound effects and combine them to create a complete playable game level. The book is designed to work step by step at the beginning of each chapter, then allow the reader to complete similar tasks on their own to show an understanding of the content. A companion website with project files and additional information is included.

Our Common Future

Struts solves the most common problems of web development. By basing your application on the Struts web application framework, you can reuse proven solutions and focus on what's unique to your own case. Struts is an open-source product distributed by the Apache Software Foundation.

Lord of the Vampires 4-in-1

This book provides substantial information on thermal insulation. Thermal insulation is fundamentally defined as the technique of reduction of heat transfer between objects which are in thermal contact or in range of radiative influence. This book provides fundamental practical and prospective applications of the concept of saving energy and also offers methods and approaches regarding this subject. It demonstrates several methods related to the concept of thermal insulation, like the processes and endeavors to build an efficient passive building model. This book will be beneficial for readers interested in this field.

PowerBuilder® 6 A Developer's Guide PowerBuilder 6: A Developer's Guide is the most comprehensive tutorial and reference for PowerBuilder developers using PowerSoft's Desktop and Enterprise editions. Based on the author's authoritative PowerBuilder seminars, this guide offers proven examples, full source code, and expert advice that can make any PowerBuilder user into a PowerBuilder master. The first section teaches PowerBuilder fundamentals, from using painters to creating and manipulating windows. More advanced topics like embedded SQL, inheritance, and distributing applications round out the core areas that every PowerBuilder developer needs to master. The second section tackles high-level issues: developing multi-tiered applications, Internet development, advanced

DataWindows, extending PowerBuilder, working with objects and the PowerBuilder Foundation Class Library. The final section covers PowerBuilder certification and preparing for the Certified PowerBuilder Developer exam. The companion CD-ROM includes full source code for more than 30 example applications that demonstrate every key feature of PowerBuilder. Additions, updates, and revisions to the book will be available from the author's Web site via links on the CD-ROM and Web links from <http://www.mandt.com>. You'll Get Complete Coverage of: PowerBuilder programming basics Distributed processing and Internet development Multiple Document Interfaces Event-driven programming Every important painter—from PowerScript Painter to DataWindow Objects Encapsulation with OOP and user objects Extending PowerBuilder with DLLs, OLE, and DDE Creating and programming advanced Data Windows including graphs and reports <http://www.idgbooks.com>

Software Development

This is the eBook version of the print title. Note that the eBook does not provide access to the practice test software that accompanies the print book. Learn, prepare, and practice for MCSA 70-410 exam success with this Cert Guide from Pearson IT Certification, a leader in IT certification. Master MCSA 70-410 exam topics for Windows Server 2012 R2 installation and configuration Assess your knowledge with chapter-ending quizzes Review key concepts with exam preparation tasks MCSA 70-410 Cert Guide: Installing and Configuring Microsoft® Windows Server 2012R2 is a best-of-breed exam study guide. Best-selling authors and expert instructors Don Poulton and David Camardella share preparation hints and test-taking tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. Material is presented in a concise manner, focusing on increasing your understanding and retention of exam topics. The book presents you with an organized test preparation routine through the use of proven series elements and techniques. Exam topic lists make referencing easy. Chapter-ending Exam Preparation Tasks help you drill on key concepts you must know thoroughly. Review questions help you assess your knowledge, and a final preparation chapter guides you through tools and resources to help you craft your final study plan. Well-regarded for its level of detail, assessment features, and challenging review questions and exercises, this study guide helps you master the concepts and techniques that will enable you to succeed on the exam the first time. The study guide helps you master all the topics on the MCSA 70-410 exam, including the following: Installing and configuring Windows Server 2012 Configuring Windows Server 2012 R2 local storage Configuring access to files and shares Configuring and monitoring print and document services Configuring remote management of servers Configuring Hyper-V server virtualization Creating and configuring virtual machine storage and virtual networks Configuring IPv4 and IPv6 addressing Configuring Dynamic Host Configuration Protocol (DHCP) Deploying and configuring Dynamic Host Configuration Protocol (DHCP) Deploying and configuring Domain Name System (DNS) Installing Active Directory domain controllers Creating and managing Active Directory user and computer accounts Creating and managing Active Directory Groups and Organizational Units (OUs) Creating and applying Group Policy Objects Configuring security policies, application restrictions, and Windows Firewall Don Poulton (A+, Network+, Security+, MCSA, MCSE) is an independent consultant who has worked with

computers since the days of 80-column punch cards. He has consulted extensively with training providers, preparing study materials for Windows technologies. He has written or contributed to several Que titles, including Security+ Lab Manual; MCSA/MCSE 70-299 Exam Cram 2; MCTS 70-620 Exam Prep; and MCSA 70-687 Cert Guide: Configuring Microsoft Windows 8.1. David Camardella, an expert on deploying and administering Microsoft technologies, has served as technical reviewer on several previous Pearson Microsoft certification titles.

The Definitive DataWindow

Once upon a time...the Blood Sorcerer vanquished the kingdom of Elden. To save their children, the queen scattered them to safety and the king filled them with vengeance. Only a magical timepiece connects the four royal heirs...and time is running out.... Nicolai the vampire was renowned for his virility, but in a twist of fate, "the Dark Seducer" had become a sex slave in the kingdom of Delfina—stripped of his precious timepiece and his memory. All that remained was a primal need for freedom, revenge...and Jane Parker, the only woman who could help him rediscover his destiny.

MCITP Self-Paced Training Kit (Exam 70-647): Windows Server® 2008 Enterprise Administrator

JDBC--the Java Database Connectivity specification--is a complex set of application programming interfaces (APIs) that developers need to understand if they want their Java applications to work with databases. JDBC is so complex that even the most experienced developers need to refresh their memories from time to time on specific methods and details. But, practically speaking, who wants to stop and thumb through a weighty tutorial volume each time a question arises? The answer is the JDBC Pocket Reference, a data-packed quick reference that is both a time-saver and a lifesaver. The JDBC Pocket Reference offers quick look-ups for all methods of the standard JDBC classes. These include concise reviews of the procedures for common JDBC tasks such as connecting to a database, executing stored procedures, executing DDL and the like. You'll find documentation of the connect string formats for the most common databases, including Oracle, SQL-Server, and PostgreSQL. You'll even find information on working with large objects, and on using SQL99 user defined datatypes to work with object-relational data. Searching for this sort of material through large tutorials is frustrating and a waste of time, but this pocket-sized book is easy to take anywhere and makes finding the information you need a snap. O'Reilly's Pocket References have become a favorite among developers everywhere. By providing a wealth of important details in a concise, well-organized format, these handy books deliver just what you need to complete the task at hand. When you've reached a sticking point and need to get to the answer quickly, the new JDBC Pocket Reference is the book you'll want close at hand.
