## The Language of Trust

Vice Adm. William H. McRaven helped to devise the strategy for how to bring down Osama bin Laden, and commanded the courageous U.S. military unit that carried it out on May 1, 2011, ending one of the greatest manhunts in history. In Spec Ops, a well-

organized and deeply researched study, McRaven analyzes eight classic special operations. Six are from WWII: the German commando raid on the Belgian fort Eben Emael (1940); the Italian torpedo attack on the Alexandria harbor (1941); the British commando raid on Nazaire, France (1942); the German glider rescue of Benito Mussolini (1943); the British midget-submarine attack on the Tirpitz (1943); and the U.S. Ranger rescue mission at the Cabanatuan POW camp in the Philippines (1945). The two post-WWII examples are the U.S. Army raid on the Son Tay POW camp in North Vietnam (1970) and the Israeli rescue of the skyjacked hostages in Entebbe, Uganda (1976). McRaven—who commands a U.S. Navy SEAL team—pinpoints six essential principles of “spec ops” success: simplicity, security, repetition, surprise, speed and purpose. For each of the case studies, he provides political and military context, a meticulous reconstruction of the mission itself and an analysis of the operation in relation to his six principles. McRaven deems the Son Tay raid “the best modern example of a successful spec op [which] should be considered textbook material for future missions.” His own book is an instructive textbook that will be closely studied by students of the military arts. Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. This engrossing anthology gathers together a remarkable collection of writings on the use of strategy in war. Gérard Chaliand has ranged over the whole of human history in assembling this collection—the result is an integration of the annals of military thought that provides a learned framework for understanding global political history. Included are writings from ancient and modern Europe, China, Byzantium, the Arab world, Persia, and the Ottoman Empire. Alongside well-known militarists such as Julius Caesar, Napoleon, Walter Raleigh, Rommel, and many others are "irregulars" such as Cortés, Lawrence of Arabia, and even Gandhi. Contrary to standard interpretations stressing competition between land and sea powers, or among rival Christian societies, Chaliand shows the great importance of the struggles between nomadic and sedentary peoples, and of the conflicts between Christianity and Islam. With the invention of firepower, a relatively recent occurrence in the history of warfare, modes of organization and strategic concepts—elements reflecting the nature of a society—have been key to how war is waged. Unparalleled in its breadth, this anthology will become the standard work for understanding a fundamental part of human history—the conduct of war. "This anthology is not only an unparalleled corpus of information and an aid to failing memory; it is also and above all a reliable and liberating guide for research. . . . Ranging "from the origins to the nuclear age," it compels us to widen our narrow perspectives on conflicts and strategic action and open ourselves up to the universal."—from the Foreword

We live in a highly connected world with multiple self-interested agents interacting and myriad opportunities for conflict and cooperation. The goal of game theory is to understand these opportunities. This book presents a rigorous introduction to the mathematics of game theory without losing sight of the joy of the subject. This is done by focusing on theoretical highlights (e.g., at least six Nobel Prize winning results are developed from scratch) and by presenting exciting connections of game theory to other fields such as computer science (algorithmic game theory), economics (auctions and matching markets), social choice (voting theory), biology (signaling and evolutionary stability), and learning theory. Both classical topics, such as zero-sum games, and modern topics, such as sponsored search auctions, are covered. Along the way, beautiful mathematical tools used in game theory are introduced, including convexity, fixed-point theorems, and probabilistic arguments. The book is appropriate for a first course in game theory at either the undergraduate or graduate level, whether in mathematics, economics, computer science, or statistics. The importance of game-theoretic thinking transcends the academic setting—for every action we take, we must consider not only its direct effects, but also how it influences the incentives of others.

How is it that the most carefully-laid business strategies can go horribly wrong when put into practice? Robert Rowland Smith's answer, based on years of experience in high-level consultancy, is that 'reality eats strategy for breakfast': strategy, based on projections and assuming business is a rational pursuit, can't deal with the messy reality of life. More helpful are these practical questions that can help you plan what to do when your business comes into contact with reality. From learning the lessons of the past (rather than fixating on the future) to finding out what your business is really about, he explains the real-life factors that lead to success or failure. Including many new examples from the front line, from all around the world, The Reality Test will help you establish yourself as more effective and distinctive than your competitors, who follow the same rigid theoretical avenues. Whether you ask 'Are you making enough of your weaknesses?' or 'Are you 100% productive 100% of the time?', it's time to stop living in strategy La-La Land and face reality.

Selected as a Financial Times Best Book of 2013 In Strategy: A History, Sir Lawrence Freedman, one of the world's leading authorities on war and international politics, captures the vast history of strategic thinking, in a consistently engaging and insightful account of how strategy came to pervade every aspect of our lives. The range of Freedman's narrative is extraordinary, moving from the surprisingly advanced strategy practiced in primate groups, to the opposing strategies of Achilles and Odysseus in The Iliad, the strategic advice of Sun Tzu and Machiavelli, the great military innovations of Baron Henri de Jomini and Carl von Clausewitz, the

grounding of revolutionary strategy in class struggles by Marx, the insights into corporate strategy found in Peter Drucker and Alfred Sloan, and the contributions of the leading social scientists working on strategy today. The core issue at the heart of strategy, the author notes, is whether it is possible to manipulate and shape our environment rather than simply become the victim of forces beyond one's control. Time and again, Freedman demonstrates that the inherent unpredictability of this environment-subject to chance events, the efforts of opponents, the missteps of friends-provides strategy with its challenge and its drama. Armies or corporations or nations rarely move from one predictable state of affairs to another, but instead feel their way through a series of states, each one not quite what was anticipated, requiring a reappraisal of the original strategy, including its ultimate objective. Thus the picture of strategy that emerges in this book is one that is fluid and flexible, governed by the starting point, not the end point. A brilliant overview of the most prominent strategic theories in history, from David's use of deception against Goliath, to the modern use of game theory in economics, this masterful volume sums up a lifetime of reflection on strategy.

Hindsight can become foresight if viewed through the right lens. Margin of Victory views the outcomes of five horrific twentieth century battles through the lens of military strategy; force design and modernization, all of which decisively influence the savage fighting on the day of battle. From the house to house fighting in Shanghai, China to the dense forests of Western Russia and the deserts of the Middle East, the recurring theme is powerful: Victorious nation-states accept the pressing need for change and implement the tough reforms in military organization, technology and human capital that are essential to future victory, sometimes decades before a major war begins. Meanwhile, national militaries that are allowed to live in the past, that fail to shed outworn assumptions about warfighting play catch-up when war comes; a

situation that leads to an enormous loss of human life and, ultimately, to total defeat. Margin of Victory's riveting stories of victory and defeat are presented against the backdrop of national policies, culture and history. Each chapter is a reminder that to be successful military action must always be congruent with national culture, geography and scientific-industrial capacity; that strategy and geopolitics inevitably trump ideology. Building effective military power takes time, resources and imagination. Unity of command; unity of effort and the integration of capabilities across service lines only happen when they are ruthlessly imposed from the top down. These are some of the enduring lessons in the five warfighting dramas that unfold in vivid detail on the tactical, operational and strategic levels of war. Margin of Victory concludes with a discussion of future battle and how the United States can leverage the twentieth century's lessons to secure its margin of victory in the twenty first century. The final chapter argues that America's future victories depend on a major reset of U.S. national military strategy and an overhaul of U.S. military command structures and force design. The author's reset includes the creation of a national defense staff, Joint Force Commands inside the regional unified commands and a plea to cultivate America's greatest margin of victory, its human capital; the high quality of American Soldiers, Sailors, Airmen and Marines.

we thought we knew, from the bestselling author of *Astoria* Two decades before he led America to independence, George Washington was a flailing young soldier serving the British Empire in the vast wilderness of the Ohio Valley. Naïve and self-absorbed, the twenty-two-year-old officer accidentally ignited the French and Indian War—a conflict that opened colonists to the possibility of an American Revolution. With powerful narrative drive and vivid writing, *Young Washington* recounts the wilderness trials, controversial battles, and emotional entanglements that transformed Washington from a temperamental striver into a mature leader. Enduring terrifying summer storms and subzero winters imparted resilience and self-reliance, helping prepare him for what he would one day face at Valley Forge. Leading the Virginia troops into battle taught him to set aside his own relentless ambitions and stand in solidarity with those who looked to him for leadership. Negotiating military strategy with British and colonial allies honed his diplomatic skills. And thwarted in his obsessive, youthful love for one woman, he grew to cultivate deeper, enduring relationships. By weaving together Washington’s harrowing wilderness adventures and a broader historical context, *Young Washington* offers new insights into the dramatic years that shaped the man who shaped a nation.

The Art of War (孫子兵法), literally The Laws of War (military methods) by Master Sun is the most famous ancient Chinese treatise, dedicated to a military strategy and policy, written by Sun Tzu. As Sun Tzu said the art of war is of vital importance to the State. The treatise by Sun Tzu influenced crucially on a whole military art of the East. Although it is the first treatise on the military art, it includes clearly expressed common principles of strategy as well as tactics. A special place in a military theoretical literature belongs to comments on Sun Tzu, the earliest of which appeared in the Han era (206-220 AD), and the new ones are still being created

prepared for the perpetual war that we must fight in the real world. This war occurs not only on the military battlefield, but on multiple levels of society. In business, politics, sports, even the arts, we find ourselves facing ruthless opponents that are willing to do anything to gain an edge. More troubling, however, are the battles we face with those who claim to be on our side--those who seem to play the team game, who act friendly and agreeable, only to sabotage us behind the scenes, to use the group to secure their own selfish interests. On the surface everything seems peaceful and harmonious, but just below it, it is often every man and woman for themselves. Our culture may deny this reality, but we all know it and feel it in our daily lives. As equally important as "The 48 Laws of Power" and "The Art of Seduction", "The 33 Strategies of War" by Robert Greene is a comprehensive guide to human interaction which reveals how the most ingenious and effective principles of warfare can be applied to the battles and conflicts of everyday life. Each chapter is a strategy aimed at solving a particular problem that you will often encounter in your daily struggles. The strategies range from the basic strategies of classical warfare to the dirty and unconventional strategies of modern times, and can be applied to struggles of any kind: organized warfare, business campaigns, the politics of a group, or personal relationships.
