Sharp Fear

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Kate's Capitol

"Meet Elmore Ackerman. He idolizes Sarah Roberts from afar, and has done so for more than five years. He has studied her pictures, memorized her news clippings and now waits in the dark for the day when he can make Sarah his hostage"
--Cover p. [4].

The Hostage

Marine mammals face a large array of stressors, including loss of habitat, chemical and noise pollution, and bycatch in fishing, which alone kills hundreds of thousands of marine mammals per year globally. To discern the factors contributing to population trends, scientists must consider the full complement of threats faced by marine mammals. Once populations or ecosystems are found to be at risk of adverse impacts, it is critical to decide which combination of stressors to reduce to bring the population or ecosystem into a more favorable state. Assessing all stressors facing a marine mammal population also provides the environmental context for evaluating whether an additional activity could threaten it. Approaches to Understanding the Cumulative Effects of Stressors on Marine Mammals builds upon previous reports to assess current methodologies used for evaluating cumulative effects and identify new approaches that could improve these assessments. This review focuses on ways to quantify exposure-related changes in the behavior, health, or body condition of individual marine mammals and makes recommendations for future research initiatives.

Killing Sarah

ONE OF USA TODAY'S "20 SUMMER BOOKS YOU WON'T WANT TO MISS" In the bestselling tradition of works by such authors as Susan Orlean and Mary Roach, a New York Times reporter and Pulitzer Prize finalist explores why so many people—including herself—are obsessed with horses. It may surprise you to learn that there are over seven million horses in America—even more than when they were the only means of transportation—and nearly two million horse owners. Acclaimed journalist and avid equestrian Sarah Maslin Nir is one of them; she began riding horses when she was just two years old and hasn't stopped since. Horse Crazy is a fascinating, funny, and moving love letter to these graceful animals and the people who—like her—are obsessed with them. It is also a coming-of-age story of Nir growing up an outsider within the world's most elite inner circles, and finding her true north in horses. Nir takes readers into the lesser-known corners of the riding world and profiles some of its most captivating figures. We meet Monty Roberts, the California trainer whose prowess earned him the nickname "the man who listens to horses," and his pet deer; George and Ann Blair, who at their riding academy on a tiny island in Manhattan's Harlem River seek to

resurrect the erased legacy of the African American cowboy; and Francesca Kelly, whose love for an Indian nobleman shaped her life's mission: to protect an endangered Indian breed of horse and bring them to America. Woven into these compelling character studies, Nir shares her own moving personal narrative. She details her father's harrowing tale of surviving the Holocaust, and describes an enchanted but deeply lonely upbringing in Manhattan, where horses became her family. She found them even in the middle of the city, in a stable disguised in an old townhouse and in Central Park, when she chased down truants as an auxiliary mounted patrol officer. And she speaks candidly of how horses have helped her overcome heartbreak and loss. Infused with heart and wit, and with each chapter named after a horse Nir has loved, *Horse Crazy* is an unforgettable blend of beautifully written memoir and first-rate reporting.

His Sugar Baby

Sarah Roberts receives a phone call from her colleague Parkman. It's important they meet right away as it's a matter of life and death. Because Parkman is a close friend, Sarah ignores a warning from her dead sister Vivian to stay away. When Sarah is shot, Parkman fires on the retreating four-door sedan, but is not successful in stopping the shooter. He attempts to revive Sarah until the paramedics arrive to take over. When Parkman gets to the hospital, the police question him about who really shot Sarah. After emergency surgery to remove the bullet and reduce the swelling on Sarah's brain, preliminary results show the bullet came from Parkman's gun. He asks to visit Sarah in the ICU, but now no one can find her. He is informed that Sarah Roberts was never admitted to their hospital and the doctor Parkman was talking to earlier about her condition has mysteriously disappeared. Sarah is gone. When Sarah wakes in a modified ambulance, far from the hospital in Toronto, she has retrograde amnesia, leaving her with temporary short-term memory loss. All she can remember of the night she was shot is the image of a man named Parkman. He is standing in front of her with a gun in his hand as a bullet enters her head. The people who shot Sarah are still after her. She needs to work with Parkman in order to stay alive, but all Sarah can think about is revenge for the head wound and Parkman is in her sights. The pain of betrayal goes deeper than the physical wound as Sarah hunts for her former friend while sorting the memories that return in pieces. *Killing Sarah* is an explosive ride into the depths of a strong woman who makes mistakes and learns the consequences the hard way.

In this volume of 15 articles, contributors from a wide range of disciplines present

their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Pre-Incident Indicators of Terrorist Incidents

A 2019 NPR Staff Pick How the blinding of Sergeant Isaac Woodard changed the course of America's civil rights history On February 12, 1946, Sergeant Isaac Woodard, a returning, decorated African American veteran, was removed from a Greyhound bus in Batesburg, South Carolina, after he challenged the bus driver's disrespectful treatment of him. Woodard, in uniform, was arrested by the local police chief, Lynwood Shull, and beaten and blinded while in custody. President Harry Truman was outraged by the incident. He established the first presidential commission on civil rights and his Justice Department filed criminal charges against Shull. In July 1948, following his commission's recommendation, Truman ordered an end to segregation in the U.S. armed forces. An all-white South Carolina jury acquitted Shull, but the presiding judge, J. Waties Waring, was conscience-stricken by the failure of the court system to do justice by the soldier. Waring described the trial as his "baptism of fire," and began issuing major civil rights decisions from his Charleston courtroom, including his 1951 dissent in *Briggs v. Elliott* declaring public school segregation per se unconstitutional. Three years later, the Supreme Court adopted Waring's language and reasoning in *Brown v. Board of Education*. Richard Gergel's *Unexampled Courage* details the impact of the blinding of Sergeant Woodard on the racial awakening of President Truman and Judge Waring, and traces their influential roles in changing the course of America's civil rights history.

The answer lies across the sea in a faraway land populated by a reclusive and dour race who feel nothing but disdain for both Fhrey and mankind. With time running out, Persephone leads the gifted young seer Suri, the Fhrey sorceress Arion, and a small band of misfits in a desperate search for aid—a quest that will take them into the darkest depths of Elan. Approaches to Understanding the Cumulative Effects of Stressors on Marine Mammals

Explores the unprecedented and rapid climate changes occurring in the Arctic environment. Climate change, one of the drivers of global change, is controversial in political circles, but recognized in scientific ones as being of central importance today for the United States and the world. In The Big Thaw, the editors bring together experts, advocates, and academic professionals who address the serious issue of how climate change in the Circumpolar Arctic is affecting and will continue to affect environments, cultures, societies, and economies throughout the world.

The contributors discuss a variety of topics, including anthropology, sociology, human geography, community economics, regional development and planning, and political science, as well as biogeophysical sciences such as ecology, human-environmental interactions, and climatology.
