Whereas modern societies tend to banish the dead from the world of the living, medieval men and women accorded them a vital role in the community. The saints counted most prominently as potential intercessors before God, but the ordinary dead as well were called upon to aid the living, and even to participate in the negotiation of political disputes. In this book, the distinguished medievalist Patrick J. Geary shows how exploring the complex relations between the living and dead can broaden our understanding of the political, economic, and cultural history of medieval Europe. Geary has brought together for this volume twelve of his most influential essays. They address such topics as the development of saints' cults and of the concept of sacred space; the integration of saints' cults into the lives of ordinary people; patterns of relic circulation; and the role of the dead in negotiating the claims and counterclaims of various interest groups. Also included are two case studies of communities that enlisted new patron saints to solve their problems. Throughout, Geary demonstrates that, by reading actions, artifacts, and rituals on an equal footing with texts, we can better grasp the otherness of past

societies.

The MD Anderson Manual of Medical Oncology, Second Edition

The American School Board Journal

This vintage guide from over a century ago offers timeless, practical advice on building log cabins. Simply stated, well-illustrated advice ranges from felling trees to furnishing and decorating interiors.

The Autocar

Log buildings are embedded deeply into North American history and culture. For more than one thousand years, builders have been weaving logs into homes, shelters, barns, and churches. Today, however, the buildings where we live and work are rarely handmade from natural materials. In this context, handcrafted, scribe-fitted natural log buildings are an attractive and uplifting alternative to conventional buildings and building materials. This book tells you what you need to know to build your own log home and also reveals the deep rhythms and patterns of log construction. Author Robert Chambers shows how to take naturally shaped,

tapered, round logs and scribe-fit them one to another so that they look like they actually grew together in the woods. The Log Construction Manual is filled with information available nowhere else, including the Log Selection Rules, Chambers's brilliantly simple method for choosing which log to use next; instructions for building hip and valley log rafters and roof trusses from full-round logs; step-by-step directions for laying out the sill logs for virtually any floor plan, including hexagons, prows, and more; state-of-the-art compression-fit saddle notches and underscribing to keep fits tight over time; details on scribing and cutting long grooves and corner notches just like the pros; and more. Chambers also offers advice on organizing and financing a log home project and has loads of experience to share on cutting costs and avoiding common pitfalls. He presents practical ideas for saving money and controlling costs. Although handcrafted log homes are expensive to buy, they are within reach for many as owner-managed building projects. Written concisely with great care in explaining important details, the Log Construction Manual brings clarity, insight, depth, and even humor to the log builder's craft. This is a comprehensive book for log home owner-builders, beginners as well as professionals.

State-of-the-art approaches to cancer management from the world's #1 oncology center The perfect clinical desk manual from the experts at MD Anderson Cancer Center Read the outstanding reviews of the previous edition: "As a detailed guide, [the book] offers practitioners a clear, user-friendly approach to the care of patients with cancer." -- New England Journal of Medicine "The portions of the text that summarize the chemotherapeutic literature are helpful and potentially useful to a busy medical oncologist. The graphic representations and flow charts are of high quality, are well designed and easy to follow, and are clinically useful. A number of good photographs have been provided that illustrate pathologic conditions.the Manual is well written, has extremely useful graphics, and represents a useful entry point for those interested in the management of

malignant diseases." -- International Journal of Radiation Oncology, Biology, Physics "[MD Anderson Manual of Medical Oncology] fulfills its goals of helping clinicians quickly evaluate therapeutic regimens and possibilities. Surgeons and radiation oncologists will find the text useful as a reference guide to what the medical oncologist can do and how the medical oncologist views their disciplines. The text is also of considerable help for physicians studying for board certification or recertification in medical oncology. Practicing medical oncologists would do well to have it in their personal libraries." -- Journal of the American Medical Association MD Anderson Manual of Medical Oncology offers clinicians an authoritative, easy-to-follow guide to the medical management of patients with cancer and its complications. Featuring concise but practical text and a large number of decision-making algorithms, the book gives physicians a current, templated approach to each disease and situation -- backed by the clinical expertise and authority of world recognized oncology researchers/practitioners. Key Features REVISED: completely updated coverage of the quickly evolving world of cancer therapeutics NEW: chapters include "Expert Commentary Sidebars" that provide clinical insights from leading subspecialists in radiation therapy, surgical oncology, pathology, and laboratory medicine NEW: brand new chapters on myelodysplasia, myeloproliferative diseases, and appendiceal cancer NEW: a brand new chapter on the important and underpublished topic of psycho-social issues in oncology Consistently formatted for a unified patient management strategy Packed with time-saving features, including The MD Anderson Work-Up Box and The MD

At last a paperback edition of this standard work on marine archaeology. Séan McGrail's study received exceptional critical acclaim when it was first published in hardback in 1987 and it is now revised and published in paperback for the first time. Professor McGrail provides an authoritative survey of water transport across Northern Europe from the Late Palaeolithic to the later Middle Ages, using evidence

of excavations, but also documentary sources, iconographic and ethnographic evidence. In the process he answers such key questions as How were these boats built? What sort of environment were they used in? What speeds could they achieve? and how were they navigated?

Mergent International Manual

The hewn-log house is a classic of early American architecture, evocative of the pioneer experience and westward exploration. Charles McRaven has been building and restoring hewn-log houses for 60 years. Accompanied by photography and illustrations, this book shows every step of the process. Learn to hew a log with a broadaxe, make a dovetail notch, replace rotten logs, mix chinking mortar and install it properly, find and use vintage logs, use pioneer hand tools, build a stone foundation and fireplace, and install modern utilities.

Classic Car

A visual guide to the most iconic classic cars of every decade from the 1940s to the 1980s, featuring more than 1,300 photographs and created in association with the Smithsonian Institution. From the Pontiac Chieftain to the Chevrolet Corvette, Classic Car is packed with the marques and models of every decade from the

1940s to the 1980s. Virtual tours offer close-up views of iconic models, and comprehensive catalogs showcase key features with detailed profiles and specifications. To tell the complete story of classic cars, this book also profiles famous designers and manufacturers, like Ferdinand Porsche, and places the cars into wider cultural context by charting their enduring legacy as symbols of luxury and objects of desire. Classic Car is a complete celebration of classic cars and a must-have for all classic car collectors and enthusiasts.

The Classic Hewn-log House

Relevance and Marginalisation in Scandinavian and European Performing Arts 1770–1860: Questioning Canons reveals how various cultural processes have influenced what has been included, and what has been marginalised from canons of European music, dance, and theatre around the turn of the nineteenth century and the following decades. This collection of essays includes discussion of the piano repertory for young ladies in England; canonisation of the French minuet; marginalisation of the popular German dramatist Kotzebue from the dramatic canon; dance repertory and social life in Christiania (Oslo); informal cultural activities in Trondheim; repertory of Norwegian musical clocks; female itinerant performers in the Nordic sphere; preconditions, dissemination, and popularity of equestrian drama; marginalisation and amateur staging of a Singspiel by the renowned Danish playwright Oehlenschläger, also with perspectives on the music

and its composers; and the perceived relevance of Henrik Ibsen's staged theatre repertory and early dramas. By questioning established notions about canon, marginalisation, and relevance within the performing arts in the period 1770–1860, this book asserts itself as an intriguing text both to the culturally interested public and to scholars and students of musicology, dance research, and theatre studies.
