A veteran of the Central Intelligence Agency unmasks its culture of lethal lies in this devastating exposé, now with a new foreword by David MacMichael. Ralph W.

McGehee was a patriot, dedicated to the American way of life and the international fight against Communism. Following his graduation with honors from Notre Dame, McGehee was recruited by the Central Intelligence Agency in 1952 and quickly became an able and enthusiastic cold warrior. Stationed in Southeast Asia in the mid-1960s, he worked to stem the Communist tide that was sweeping through the region, first in Thailand and later in Vietnam. But despite his notable successes in reversing enemy influence among the local peasants and villagers, McGehee found himself increasingly alienated from a company culture built on deceit and wholesale manipulation of the truth. While his country was being pulled deeper and deeper into the Vietnam quagmire, McGehee awoke to a chilling reality: The CIA was not a gatherer of actual intelligence to be employed in a legitimate war against dangerous enemies, but a tool of the president's foreign-policy staff designed solely to stifle the truth and fabricate "facts" that supported the agency's often immoral agenda. With courage and candor, Ralph McGehee illuminates the CIA's dark catalog of misdeeds in his stunning, no-holds-barred memoir of a life in the service of deception. Startling, eye-opening, and infuriating, *Deadly Deceits* is an honest and unflinching insider's look at a toxic government agency that the author cogently argues has no useful purpose and no moral right to exist.

## **Pact of the Fathers**

The extraordinary saga of the mysterious life of Kurban Said was told in amazing detail in a recent New Yorker article. One of the most beguiling mysteries it uncovered was the existence of another magical novel—The Girl From the Golden Horn. It is being published in English now for the first time. It is 1928 and Asiadeh Anbara and her father, members of the Turkish royal court, find themselves in exile in Berlin after the collapse of the Ottoman Empire. Years ago she had been promised to a Turkish prince but now, under the spell of the West, the nineteen-year-old Muslim girl falls in love and marries a Viennese doctor, an "unbeliever." But when she again meets the prince—now a screenwriter living in exile in New York—and he decide he wants her as his wife, she is torn between the marriage she made in good faith and her promised duty made long ago. The Girl From the Golden Horn is a novel of the clash of cultures and values—of prewar Istanbul and decadent postwar Berlin. And, of course, Muslims and Christians. But it is also about the clash within Asiadeh herself, and the tension between duty and desire.

## **Merry Christmas Coloring Book**

The Reshaping of British Railways is a piece of railway history every dedicated enthusiast will want in their collection. Bradshaw's Guide has given birth to a wave of nostalgia for our Victorian and Edwardian railway systems. The Reshaping of British Railways, another facsimile which will fascinate train buffs, is the document

that decimated these systems forever. With the British Rail company's failure, by the early 1960s, to stem the network's huge annual losses, the government turned to Dr Richard Beeching. He was to save money by recommending the cutting of redundant routes and services. His two reports, *The Reshaping of British Railways* (1963) and *The Development of the Major Railway Trunk Routes* (1965), were published by the British Railways Board in 1965, and offer a fascinating snapshot of our nation's railways. In the first part of this historic facsimile, Dr Beeching identifies the 2,363 stations and 5,000 miles (8,000 km) of railway line for closure - over 50% of all stations and 30% of route miles. The second part recommends a small number of major remaining routes for significant investment. Well documented nationwide protests resulted in the saving of some stations and lines, but the majority were closed as planned and Beeching's name is to this day associated with the mass closure of railways and the loss of many local services in the period that followed. Now, for the first time, this iconic piece of railway history is available in its entirety, complete with the original tables and maps of routes deemed fit for closure.

Spanish cinema is emerging as one of the most exciting, fascinating, and special cinemas in the world. Not only are others viewing Spanish films, but they are adopting Spanish producers and Spanish actors as their own. While Spanish cinema has been maturing for a long time and has been producing excellent directors, actors, and films for decades-including during the dark times of the Franco regime-only now is it winning numerous fans not only at home but also abroad. And with directors like Pedro Almodovar, actors and actresses like Javier Bardem and Penelope Cruz, and films such as *Abre los ojos* and *Alatriste* to build upon, the outlook for Spanish Cinema appears brighter than ever. *The A to Z of Spanish Cinema* provides a better understanding of the role Spanish cinema has played in film history through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on producers, directors, film companies, actors, and films."

"I don't master the mountain, I master speed." Coming from Bode Miller, this isn't boasting, it's just the way he lives: fast, honest, and wide open. In this candid book, the two-time Olympic medalist and champion skier shares his story, the secret of his success, and his philosophy of life. Born and raised "off the grid"-without electricity or indoor plumbing-in the cabin built by his father in the woods near Franconia, New Hampshire (pop. 850), Bode is unconventional to the core. The strong values of his simple upbringing, where he and his family had to "invent, grow, or carry in" all the essentials have made Bode unique among today's top sports stars. Bode's approach to life is straightforward: "Get a plan, stick to it, and trust your instincts . . . and almost anything is possible." And practically since birth, the iconoclastic Bode has been achieving the impossible and

laying down tracks for others to follow. He revolutionized his sport by adopting new and crossover technologies, such as “shape” skis. He drives his tradition-bound European rivals to distraction, skiing and winning by instinct. His outsider status, killer smile, and outspoken yet laid-back persona have earned him a reputation as the Michael Jordan of skiing. Men’s Journal named Bode the second greatest athlete in the world. And in the 2005 season, Bode may have moved up a notch by becoming the first American to win the Overall World Cup Alpine championship in twenty-two years. In short, he is the kind of person everybody wants to know and hang out with. In a book loaded with insight, good humor, and eye-opening stories about the world of competitive skiing, Bode, as always, holds nothing back.

The Chinese are inordinately proud of having invented, among a whole host of other things, the compass (without which the world would have got lost), paper (without which books would not exist), the printing press (ditto), porcelain (no pretty matching chinaware), silk (no decadence), pasta (what would the Italians eat?), the wheelbarrow (how would civilisation have fared without it?) and the bristle toothbrush. A guide to understanding the Chinese which dispels or confirms preconceived prejudices with humor and insight.

### **Bank**

This book presents documentation, reflection and critical analysis of two award-winning projects Monash Steps and Stawell Steps. These linked projects were designed and built by Monash Architecture students under the leadership of Hiroshi Nakao and Nigel Bertram. The works were developed in close collaboration with

the town of Stawell, through partnership with local brick maker Krause bricks and civil engineers at the Northern Grampians Shire council. Monash Steps and the associated exhibition were installed at the Monash University Museum of Art in 2012, making a temporary occupiable space using dry-stacked bricks. Stawell Steps is a permanent installation on the banks of Cato Lake in the centre of Stawell. It acts as permanent flood-relief infrastructure for the town, and provides a new type of community space within the park. The book includes specially commissioned photographic material of the works, significant historic buildings and landscapes in Stawell, and the Krause brickworks. Original drawings and conceptual material are combined with post-occupancy images and texts from a range of different viewpoints. About the authors: Nigel Bertram is a Director of NMBW Architecture Studio in Melbourne and Practice Professor of Architecture at Monash University, where his current research projects address urban housing and infrastructure for water-sensitive cities. NMBW's architectural work has been published and awarded across categories including urban design, housing, small public works, adaptive re-use of existing buildings and peripheral urban design strategies. Hiroshi Nakao is Professor of Multidisciplinary Design Science at the Shonan Institute of Technology. He studied architecture at the Kyoto Institute of Technology and art at the Tsukuba University, and works across the border between art and architecture, with solo exhibitions in Tokyo, Oslo, London and Hamburg to his credit.
