Scottish Culture and Scottish Education 1800-1980

European Universities from the Enlightenment to 1914 is an authoritative and unique work. Though patronized by a social elite, universities before 1914 were not ivory towers, but reflected the political and social conflicts of their day. Anderson combines chapters on national university systems (including Britain) with a searching and far-ranging discussion of more general themes. The book is an essential contribution both to modern European history, and to understanding the background of contemporary university problems.

The Moravians in Georgia, 1735-1740

This book, originally published in 1988, examines the Highlands and Islands of Scotland over several centuries and charts their cultural transformation from a separate region into one where the processes of anglicisation have largely succeeded. It analyses the many aspects of change including the policies of successive governments, the decline of the Gaelic language, the depressing of much of the population into peasantry and the clearances.

A Woman's Claim of Right in Scotland

Toddler mealtimes can be a battleground. And for busy parents, time for preparing food is in short supply. The UK's number-one expert on feeding children, Annabel

Eight Great Tragedies

Education and Opportunity in Victorian Scotland

Essays by eminent critics accompany the complete texts of eight important dramatic works.

Universities and Elites in Britain Since 1800

The Moravian Brethren are one of the most notable of the pietistic sects to emerge from the Protestant Reformation. Mrs. Fries here documents the brief history of the Moravian community in Georgia, commencing with an overview of the sect and continuing through the negotiations between Brethren leader August Spangenburg

and Georgia founder General James Oglethorpe, establishment of the Brethren community in Savannah, missionary work among the Creeks, and the departure of the Moravians for England, Pennsylvania, and other locations. Genealogists will find numerous references to transfers of land involving the Moravians, settlement maps, passenger lists of Moravian arrivals, a brief list of Moravian deaths in Georgia, and a name index to the persons mentioned in the text.

Capital and Class in Scotland

European Universities from the Enlightenment to 1914

Scotland's education system has been claimed by many to be one of the most successful in the world and its alleged decline in recent decades has generated a great deal of controversy. This book is the first full account of the history of twentieth-century Scottish education, by Lindsay Paterson, a leading specialist in the area. Scottish Education investigates Scotland's response to the key question faced by all mass systems of education. How can democracy be reconciled with the necessity of selection - both selection of culture in the maintenance of excellence, and selection of people, allocating them to differentiated occupations while also preparing them for life as equal citizens in the common culture of the

community? Paterson argues that the Scottish answer to this has been recurrent attempts to give wide access to common types of educational institution, but continuing to define that education in fairly traditional academic terms. This is then also Scotland's attempt to reconcile the tension between social solidarity and liberal opportunity, between the needs of the individual and the needs of society and its inherited culture. This broad-ranging and stimulating account of a century of Scottish education is organised chronologically into two broad parts: Competition and Opportunity, 1880s-1930s; and Welfare and Individualism, 1940s-1990s. Within these periods are chapters on each of the main sectors of education.
