The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

New York Times Bestseller • A complete meat and brisket-cooking education from the country's most celebrated pitmaster and owner of the wildly popular Austin restaurant Franklin Barbecue. When Aaron Franklin and his wife, Stacy, opened up a small barbecue trailer on the side of an Austin, Texas, interstate in 2009, they had no idea what they'd gotten themselves into. Today, Franklin Barbecue has grown into the most popular, critically lauded, and obsessed-over barbecue joint in the country (if not the world)—and Franklin is the winner of every major barbecue award there is. In this much-anticipated debut, Franklin and coauthor Jordan Mackay unlock the secrets behind truly great barbecue, and share years' worth of hard-won knowledge. Franklin Barbecue is a definitive resource for the backyard pitmaster, with chapters dedicated to building or customizing your own smoker; finding and curing the right wood; creating and tending perfect fires; sourcing top-quality meat; and of course, cooking

mind-blowing, ridiculously delicious barbecue, better than you ever thought possible.

"Religion 261, Introduction to Family History, is a one-semester course in which you will learn gospel doctrines and principles essential to the work of redeeming the dead and how to find information about your ancestors that is needed to perform

saving ordinances for them. The Lord has revealed that a great missionary effort is under way in the spirit world (see D&C 138:28–37). You become part of this great work when you identify your ancestors who did not receive the essential gospel ordinances in this life. It is your privilege to be baptized, confirmed, endowed, and sealed in their behalf in the temple, and males may receive the Melchizedek Priesthood for deceased males there. In this way all of our Heavenly Father’s children can come unto Christ and be perfected in Him. President Wilford Woodruff (1807–98) spoke about the significance of the work of redeeming the dead: “I wish many times that the veil were lifted off the face of the Latter-day Saints. I wish we could see and know the things of God as they do who are laboring for the salvation of the human family who are in the spirit world; for if this were so, this whole people, with very few, if any, exceptions, would lose all interest in the riches of the world, and instead thereof their whole desires and labors would be directed to redeem their dead, to perform faithfully the work and mission given us on earth; so that when we ourselves should pass behind the veil and meet with Joseph and the ancient apostles, and others who are watching over us and who are deeply interested in our labors, we might feel satisfied in having done our duty” (The Discourses of Wilford Woodruff, ed. G. Homer Durham [1946], 152).”

After 20 years of glorious ‘failure’, the best-loved

team in Formula One is consigned to the history books, and it deserves one of its own. Minardi had a successful time in Formula Two until the tiny Italian outfit was ready to hit the big time in 1985. It somehow survived in F1's shark-infested waters as bigger teams (Lotus, Arrows, Tyrrell) were dragged under. They have a truly international fan-base and are the 'second team' of most F1 devotees. Minardi is held in such affection as everyone loves the plucky underdog – Minardi's annual budget would have lasted one month at the other Italian team up the road. Yet, from its plant in Faenza near Bologna, Minardi has produced cars that qualify, sometimes score points and often lead the way in their technology. Gian Carlo Minardi also developed a reputation as a fabulous talent-spotter – Fisichella, Trulli, Webber and the youngest ever World Champion Alonso all started their F1 careers with Minardi. For the last five years, Minardi was owned by controversial Australian tycoon Paul Stoddart. Cast as David against the Goliath of F1's governing body, Stoddart constantly hit the headlines as he tried to get a more equal share of the sport's billions. Ultimately, he failed and Red Bull has now bought the team. Despite a petition of 15,000 names, the Minardi name has vanished from the F1 grid and true motorheads miss it. This is the one and only inside account, with exclusive, comprehensive interviews with bosses, drivers and engineers. 140 unique photos complete this revelatory tale.

Basic knowledge about fluid mechanics is required in various areas of water resources engineering such as designing hydraulic structures and turbomachinery. The applied fluid mechanics laboratory course is designed to enhance civil engineering students' understanding and knowledge of experimental methods and the basic principle of fluid mechanics and apply those concepts in practice. The lab manual provides students with an overview of ten different fluid mechanics laboratory experiments and their practical applications. The objective, practical applications, methods, theory, and the equipment required to perform each experiment are presented. The experimental procedure, data collection, and presenting the results are explained in detail. LAB

The right to freedom of expression entails duties and responsibilities and is subject to certain limits, provided for in Article 10.2 of the European Convention on Human Rights, which are concerned, among other things, with protecting the rights of others. Identifying what constitutes "hate speech" is especially difficult because this type of speech does not necessarily involve the expression of hatred or feelings. On the basis of all the applicable texts on freedom of expression and the case law of the European Court of Human Rights and other bodies, the author identifies certain parameters that make it

possible to distinguish expressions which, although sometimes insulting, are fully protected by the right to freedom of expression from those which do not enjoy that protection.

We live in a profoundly spiritual age, but not in any good way. Huge swaths of American culture are driven by manic spiritual anxiety and relentless supernatural worry. Radicals and traditionalists, liberals and conservatives, together with politicians, artists, environmentalists, followers of food fads, and the chattering classes of television commentators: America is filled with people frantically seeking confirmation of their own essential goodness. We are a nation desperate to stand of the side of morality--to know that we are righteous and dwell in the light. In *An Anxious Age*, Joseph Bottum offers an account of modern America, presented as a morality tale formed by a collision of spiritual disturbances. And the cause, he claims, is the most significant and least noticed historical fact of the last fifty years: the collapse of the mainline Protestant churches that were the source of social consensus and cultural unity. Our dangerous spiritual anxieties, broken loose from the churches that once contained them, now madden everything in

American life. Updating The Protestant Ethic and the Sprit of Capitalism, Max Weber's sociological classic, An Anxious Age undertakes two case studies of contemporary social classes adrift in a nation without the religious understandings that gave them meaning. Looking at the college-educated elite he calls "the Poster Children," Bottum sees the post-Protestant heirs of the old mainline Protestant domination of culture: dutiful descendants who claim the high social position of their Christian ancestors even while they reject their ancestors' Christianity. Turning to the Swallows of Capistrano, the Catholics formed by the pontificate of John Paul II, Bottum evaluates the early victories--and later defeats--of the attempt to substitute Catholicism for the dying mainline voice in public life. Sweeping across American intellectual and cultural history, An Anxious Age traces the course of national religion and warns about the strange angels and even stranger demons with which we now wrestle. Insightful and contrarian, wise and unexpected, An Anxious Age ranks among the great modern accounts of American culture. From the Hardcover edition.
