## Business Processes: Operational

## Solutions for SAP Implementation

"This book is about Enterprise Resource Planning (ERP) systems implementation, focusing on business operations/processes and information systems to support business operations/processes"--Provided by publisher.

### SAP Planning

- Provides a complete overview of the solution for the management of business applications
- Explains the processes and functions in release 7.1 clearly
- Shows all tools in day-to-day use

What's new in SAP Solution Manager 7.1? In this book, you'll find much more than the answer to this question. Discover all of the platform's functions and learn how to support and improve the planning, operation, and optimization of your solution with SAP Solution Manager.

Comprehensive and up to date, this definitive book leaves no questions unanswered!

All Concepts Explained Concisely

Whether it's the new Monitoring and Alerting Infrastructure, Custom Code Management, or Change Impact Analysis that you are interested in, you can take a look "under the hood" of SAP Solution Manager and understand its concepts.

Every Phase, Every Process

Find out how SAP Solution Manager supports you in all project phases- from the creation of the Business Blueprint, to the continuous optimization of your solution.

Tools in Action

Find comprehensive descriptions and screenshots that show the essential functional areas of SAP Solution Manager in use.

Customer

Cases Become inspired for your own project! Ten articles will show you how other customers use the new features included in SAP Solution Manager. New in This Edition Discover the management of non-SAP software, Monitoring and Alerting, Landscape Management Database, and much more. This completely revised edition brings you right up to date.

### **Rapid Deployment of SAP Solutions**

SAP is a market leader in enterprise business application software. SAP solutions provide a rich set of composable application modules, and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite. In most cases, companies that adopt SAP software remain heterogeneous enterprises running both SAP and non-SAP systems to support their business processes. Regardless of the specific scenario, in heterogeneous enterprises most SAP implementations must be integrated with a variety of non-SAP enterprise systems: Portals Messaging infrastructure Business process management (BPM) tools Enterprise Content Management (ECM) methods and tools Business analytics (BA) and business intelligence (BI) technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP-centric environments. However, the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance. When SAP software is used in a large, heterogeneous

enterprise environment, SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality, and to integrate the SAP solutions with non-SAP systems. This IBM® Redbooks® publication explains the value of integrating IBM software with SAP solutions. It describes how to enhance and extend pre-built capabilities in SAP software with best-in-class IBM enterprise software, enabling clients to maximize return on investment (ROI) in their SAP investment and achieve a balanced enterprise architecture approach. This book describes IBM Reference Architecture for SAP, a prescriptive blueprint for using IBM software in SAP solutions. The reference architecture is focused on defining the use of IBM software with SAP, and is not intended to address the internal aspects of SAP components. The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy, efficiency, and balance. The majority of the most important architectural domain topics, such as integration, process optimization, master data management, mobile access, Enterprise Content Management, business intelligence, DevOps, security, systems monitoring, and so on, are covered in the book. However, there are several other architectural domains which are not included in the book. This is not to imply that these other architectural domains are not important or are less important, or that IBM does not offer a solution to address them. It is only reflective of time constraints, available resources, and the complexity of assembling a book on an extremely broad topic. Although more content could have been

added, the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains, and it is hoped that this book provides great value to those reading it. This IBM Redbooks publication is targeted to the following audiences: Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large-scale SAP projects. IT architects and consultants integrating IBM technology with SAP solutions.

### **SAP Solution Manager**

No testing means no Go-live! But how do you make sure that your tests are comprehensive and deliver valid results? This complete guide to test planning and test execution answers all of your questions. Not only will you learn the basics for a test strategy and a test methodology that fit the requirements of your solution, you will also understand functionality and usage of all the tools SAP and their partners provide for testing: Extensive, practical chapters on the most important tools, SAP Solution Manager and eCATT, as well as substantial coverage of TDMS, HP Quality Center, and SAP LoadRunner show exactly how to perform functional and performance tests. In addition, for each tool you'll find a real-life project report from a well known SAP customer. For this second edition, the book has been thoroughly revised and extended by

more than 350 pages. New topics include SAP TAO, HP Quality Center, RunSAP, and SOA testing.

### **Testing SAP Solutions**

SAP solutions provide a rich set of composable application modules, and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite. Enabling mobile access to SAP business functions and data for enterprise clients, employees, and business partners is a typical requirement for SAP projects. This IBM® Redpaper™ publication describes the benefits of the IBM MobileFirst™ Platform Foundation security framework, which is an essential building block of the IBM MobileFirst platform. This paper also discusses key capabilities in IBM MobileFirst Platform to authenticate with SAP business systems from mobile applications. The scenarios in this paper demonstrate these features: How to develop a custom login module with IBM MobileFirst to authenticate mobile user access to an SAP enterprise resource planning (ERP) system. How to implement single sign-on (SSO) authentication in a mobile application to access SAP business systems using a pre-built adapter for IBM Cast Iron included with IBM MobileFirst and the ready-to-use adapter for SAP NetWeaver Gateway, also included with IBM MobileFirst. How to take advantage of the offline capabilities included in IBM MobileFirst Platform Foundation V6.3 to store business data locally, act on this data, and synchronize the data with the originating SAP ERP system. This paper is for mobile

application developers and technical consultants who design and build systems of engagement to interact with SAP solutions in the heterogeneous enterprise.

### **SAP Planning**

Enter the fast-paced world of SAP HANA 2.0 with this introductory guide. Begin with an exploration of the technological backbone of SAP HANA as a database and platform. Then, step into key SAP HANA user roles and discover core capabilities for administration, application development, advanced analytics, security, data integration, and more. No matter how SAP HANA 2.0 fits into your business, this book is your starting point. In this book, you'll learn about:

- a. Technology Discover what makes an in-memory database platform. Learn about SAP HANA's journey from version 1.0 to 2.0, take a tour of your technology options, and walk through deployment scenarios and implementation requirements.
- b. Tools Unpack your SAP HANA toolkit. See essential tools in action, from SAP HANA cockpit and SAP HANA studio, to the SAP HANA Predictive Analytics Library and SAP HANA smart data integration.
- c. Key Roles Understand how to use SAP HANA as a developer, administrator, data scientist, data center architect, and more. Explore key tasks like backend programming with SQLScript, security setup with roles and authorizations, data integration with the SAP HANA Data Management Suite, and more.

Highlights include: 1) Architecture 2) Administration 3) Application development 4) Analytics 5) Security 6) Data integration 7) Data architecture 8) Data center

### **IBM Storage Solutions for SAP Applications Version 1.4**

Provides you with the tools that show you how to effectively manage your data. From SAP Data Services to various solutions like SAP Power Designer, this title helps you learn what the different solutions are and how they work together. It also offers detailed information on SAP's different EIM solutions to learn what they can do for you.

### **Integrating IBM Security and SAP Solutions**

Enables you learn to carefully map your business' financial path. From planning through integration, this title helps you understand the business steps and requirements needed to work with SAP's solutions for enterprise performance management.

### **Printing in SAP**

When designing your global SAP systems, you must consider the key question of whether you should implement one global system or several distributed local systems. This book helps you to make a sound decision and successfully implement the most appropriate system architecture. In this book, you'll learn about the business process challenges faced by a global enterprise, and you'll explore the technical requirements for carrying out global implementation projects. All relevant subject areas are covered, including the many different requirements global

systems must meet, factors influencing the architecture, and available architecture options. In addition, you'll find valuable information and best practices on how to optimally map system topologies through IT. Extensive customer examples and an invaluable decision matrix serve to round off this comprehensive guide.

### **Financial Planning and Analysis with SAP**

Inter-organizational Cooperation with SAP Solutions - now in its second edition -describes the potential for cooperation in supply chain networks as well as the use of mySAP solutions in an inter-organizational context. The main focus is on applications from the fields of XML/EDI, data warehousing, supply chain management and electronic markets. On the basis of five case studies from the automotive industry, the use of mySAP solutions is demonstrated in practice. This second edition has been totally revised to take account of current challenges concerning building up cooperation from both the management and the software perspective. In order to achieve this, the author team was expanded.

### **Implementing SAP Business Suite on SAP HANA**

SAP can help you capture better information and deliver it more quickly, allowing you to make better decisions and maximize the business value of everything you do. However, SAP implementations require massive effort, total buy-in, and significant

change throughout the organization. In *SAP Implementation Unleashed*, 10 expert SAP project managers, functional consultants, and technologists guide you through the entire journey, helping you avoid pain and pitfalls and gain all the benefits of SAP. The authors introduce start-to-finish business, technical, and project management roadmaps for successful SAP implementation. Then, drawing on their immense experience, they walk you through the entire process of planning and deployment—addressing make-or-break issues and hidden gaps that other guidebooks ignore. You'll discover how to employ processes, models, and toolsets that help you achieve implementation excellence while systematically reducing cost and business risk. Along the way, you'll find actionable advice and real-world insight into innovative project management, best-suited leadership, effective load testing, contemporary infrastructure implementation, and more. George W. Anderson is responsible for providing enterprise applications thought leadership for the EDS/HP office of the CTO. A long-time SAP consultant and PMI-certified project manager, George has authored several best-selling books and enjoys new challenges. Charles D. Nilson is a senior program manager for EDS/HP and has led many successful SAP implementation teams over the years. He is a PMI PMP and is SAP Partner Academy certified in MM and PP. Tim Rhodes is a senior SAP technical consultant for EDS/HP and a Basis/infrastructure veteran focused on implementing, migrating, and upgrading SAP Business Suite and NetWeaver solutions. Tim is also an SAP-certified technical consultant, OCP, MCSE, and HP Master ASE. Detailed Information on How To

Define the business vision driving your implementation, and use it to design your solution  
Use TCO techniques to fully understand SAP's financial impact in your organization  
Structure your SAP project management office, business teams, technical support organization, and overall project team  
Size, plan, and test your SAP infrastructure to deliver the best performance and availability at the best cost  
Integrate SAP into an SOA environment  
Install and configure SAP Business Suite and NetWeaver components  
Perform basic functional configuration, testing, and change management activities  
Enable a smooth transition by successfully performing the critical tasks that immediately precede SAP Go-Live  
Choose the right mix of tools and applications to test, manage, and monitor SAP  
Prepare your SAP Operations team for its post-implementation responsibilities

### **SAP NetWeaver AS ABAP - System Administration**

Find configuration, troubleshooting, and tips and tricks for local and server-based printing  
Discover access methods, printing in Windows, forms, barcodes, and much more  
Applicable for all releases from 4.6  
Printing problems abound again and again in everyday jobs. As an administrator, you need solutions for the activation of different printers and printing types, the transition to new hardware, printing in several locations, the use of various technologies, and the output of international characters, to name a few. This book teaches you

everything you need to know to configure printing setup (software and hardware side), and describes the ways in which data from the SAP system can be converted in different print formats (ABAP lists, SAPscript, Smart Forms, and Interactive Forms). You will also find numerous screenshots and detailed descriptions of configuration parameters that will continue to help you in your daily work. Don't throw your printer out the window this book gives you all the answers to the most frequently asked questions for output management in SAP systems in one resource

### **SAP Activate**

### **SAP Solution Manager**

\* Your one-stop overview of SAP Product Lifecycle Management \* Master the functionalities and processes of SAP PLM \* Take your products from concept to delivery and beyond \* Up to date for SAP PLM 7.02 and SAP ERP 6.0, EHPs 5 and 6 This comprehensive guide to SAP Product Lifecycle Management walks you through the business processes, functions, and features of the software solutions that manage the countless product-specific business objects. From product innovation and design to product data management, from change request to execution, and from product compliance to analytics, leverage the best practices that will successfully keep your organization ahead of its competition. Product Development Full coverage of the product strategy

and planning phase will help you develop product concepts, investigate opportunities, and track the product ideas to grow your product portfolio. Product Data Management Use the SAP ERP and SAP PLM data model to provide all relevant parties with the metrics they require as the product data evolves. Maintenance and Customer Service Explore the business processes that govern product maintenance and customer service, product quality management, product change management, product compliance, and operational risk management. Project Management Pipeline Learn to use monitoring tools for project budgets, costs, progress, and deliverables with SAP Project System and SAP Project and Portfolio Management solutions. Step-by-Step Coverage Examine the diagrams, workflows, and screenshots that complement in-depth text coverage of important processes.

### **SAP Implementation Unleashed**

Managing IT like a business demands integrated and systematic business and IT insight the kind of integration and systematic insight that SAP has spent the last 35 years helping the world's leading companies achieve. Best-run businesses use SAP® solutions to automate key business processes so they can close the gap between strategy and execution. Best-run businesses drive clarity into their organizations by gaining insight for improved performance, efficiency for optimized operations, and flexibility to adapt quickly to changing circumstances. Like best-run businesses, best-run IT organizations are able to optimize operations,

maximize innovation, and adjust rapidly to evolving business needs. Their IT management solutions help them better understand themselves and their customers and make the best decisions in the face of challenging expectations and constraints. This book outlines SAP's view on best-run IT. It will help orient you to our related solutions and provide you with ideas for driving clarity and business value in your IT organization.

### **Extending SAP Solutions to the Mobile Enterprise with IBM MobileFirst Platform Foundation**

Gain a better understanding of implementing SAP S/4HANA-based digital transformations. This book helps you understand the various components involved in the planning and execution of successful SAP S/4HANA projects. Learn how to ensure success by building a solid business case for SAP S/4HANA up front and track business value generated throughout the implementation. Implementing SAP S/4HANA provides a framework for planning and executing SAP S/4HANA projects by articulating the implementation approach used by different components in SAP S/4HANA implementations. Whether you are mid-way through the SAP S/4HANA program or about to embark on it, this book will help you throughout the journey. If you are looking for answers on why SAP S/4HANA requires special considerations as compared to a traditional SAP implementation, this book is for you. What You Will Learn Understand various components of your SAP S/4HANA project Forecast

and track your success throughout the SAP S/4HANA implementation Build a solid business case for your SAP S/4HANA program Discover how the implementation approach varies across these components Who This Book Is For SAP S/4HANA clients (line managers and consultants).

### **MySAP.com Industry Solutions**

### **Global SAP Systems - Design and Architecture**

The first and only book to offer detailed explanations of SAP ERP sales and distribution As the only book to provide in-depth configuration of the Sales and Distribution (SD) module in the latest version of SAP ERP, this valuable resource presents you with step-by-step instruction, conceptual explanations, and plenty of examples. If you're an SD consultant or are in charge of managing an SAP implementation in your enterprise, you'll want this valuable resource at your side SAP is one of the leading Enterprise Resource Planning (ERP) software products on the market, with over 40,000 implementations Covers the latest version of SAP ERP-ECC 6.0 Covers common through advanced configurations, so it's helpful no matter what your level of experience with SAP Explains the conceptual framework behind the configuration process If your company uses the SD module, keep this indispensable guide on hand.

### **Implementing SAP S/4HANA**

Many large and medium-sized organizations have made strategic investments in the SAP NetWeaver technology platform as their primary application platform. In fact, SAP software is used to manage many core business processes and data. As a result, it is critical for all organizations to manage the life cycle of user access to the SAP applications while adhering to security and risk compliance requirements. In this IBM® Redbooks® publication, we discuss the integration points into SAP solutions that are supported by the IBM Security access and identity management product capabilities. IBM Security software offers a range of identity management (IdM) adapters and access management components for SAP solutions that are available with IBM Tivoli® Identity Manager, IBM Tivoli Directory Integrator, IBM Tivoli Directory Server, IBM Access Manager for e-business, IBM Tivoli Access Manager for Enterprise Single Sign-On, and IBM Tivoli Federated Identity Manager. This book is a valuable resource for security officers, consultants, administrators, and architects who want to understand and implement an identity management solution for an SAP environment.

### **Manage Your SAP Projects with SAP Activate**

This volume includes a series of articles describing how SAP's industry-specific solutions will develop in relation to the mySAP.com strategy. It examines different markets and shows how their development will be shaped by the opportunities provided by the Internet.

### **SAP Hardware Solutions**

This IBM® Redpaper™ publication is intended as an architecture and configuration guide to set up the IBM System Storage™ for the SAP HANA tailored data center integration (SAP HANA TDI) within a storage area network (SAN) environment. SAP HANA TDI allows the SAP customer to attach external storage to the SAP HANA server. The paper also describes the setup and configuration of SAP Landscape Management for SAP HANA systems on IBM infrastructure components: IBM Power Systems and IBM Storage based on IBM Spectrum® Virtualize. This document is written for IT technical specialists and architects with advanced skill levels on SUSE Linux Enterprise Server or Red Hat Enterprise Linux (RHEL) and IBM System Storage. This document provides the necessary information to select, verify, and connect IBM System Storage to the SAP HANA server through a Fibre Channel-based SAN. The recommendations in this Blueprint apply to single-node and scale-out configurations, and Intel and IBM Power based SAP HANA systems.

### **SAP for Universities**

This book - compiled by software architects from SAP - is a must for consultants, developers, IT managers, and students working with SAP ERP, but also users who want to know the world behind their SAP user interface.

### **SAP® MM Questions and Answers**

- Understand the Basis system's inner workings to quickly address critical situations
- Get step-by-step instructions and practical tips on administration
- Explore new information on SAP Solution Manager 7.1, enhancement packages, and the new monitoring infrastructure
- 4th edition, updated and expanded

In the fourth edition of this flagship reference, you'll find updated, expanded, and revised information of the most important administration topics for SAP NetWeaver Application Server ABAP. From getting started with the system, to client administration and authorization concepts, to system monitoring, you'll find all administration tools and practical instructions to optimally configure your system. This book is an essential companion for your daily work.

**All Concepts Explained** Learn everything you need to know about the functioning of SAP Basis. After reading this book, SAP specifics such as work processes, authorizations, and monitoring will no longer baffle you.

**Tools in Practical Use** Get to know the function and handling of all administration tools, which includes SAP NetWeaver Administrator, DBA Cockpit, transport tools, and many more.

**Concrete Instructions** Reproduce the most essential administrator tasks, based on detailed descriptions and comprehensive screenshots.

**Tips from SAP Support Experts** Gear up for critical situations, and benefit from the day-to-day experience that the authors gained in many years of working in SAP support.

**New in this Edition** Expand your knowledge with this new edition. It now includes sections on SAP Solution Manager 7.1, Monitoring and Alert Infrastructure, System Landscape Directory, and

CTS+.Highlights• SAP NetWeaver AS ABAP architecture• Dialog and background processing• Accounting and lock management• Setting up a system landscape• Client administration• SAP clients, users, and authorizations administration• Software logistics and instance maintenance• System monitoring• SAP Solution Manager

### **Sap S/4hana**

SAP is the world's leading provider of ERP software and services, with worldwide revenue in 2004 of \$9.7 billion and a 57 percent market share among major business application providers; it is one of the world's largest software companies overall ERP is a flexible, open technology platform that helps businesses run more efficiently (and profitably) by providing integrated management of key operations and supply chains Written for IT professionals who find it hard to get through SAP's complex documentation, our book demonstrates how ERP can cut costs, provides a clear overview of how the ESA (enterprise service architecture) model affects ERP, and shows how to implement the new ERP in the real world Topics covered include reducing the cost of an existing IT backbone, using the new ERP to address a company's "pain points" and challenges, and proving the value of ERP through ROI (return on investment) and TCO (total cost of ownership) studies

### **Profit from Software Ecosystems**

Explore and use the agile techniques of SAP Activate

## Read Online What Are Sap Solutions

Framework in your SAP Projects. About This Book Explore the three pillars of SAP Activate and see how it works in different scenario. Understand and Implement Agile and Scrum concepts in SAP Activate. Get to Grip with SAP Activate framework and manage your SAP projects effectively. Who This Book Is For This book is for readers who want to understand the working of SAP Activate and use it to manage SAP projects. Prior knowledge of SAP Hana is must. What You Will Learn Understand the fundamentals of SAP S4/HANA. Get familiar with the structure and characteristics of SAP Activate. Explore the application scenarios of SAP Activate. Use Agile and Scrum in SAP Projects effectively and efficiently Implement your learning into a sample project to explore and understand the benefits of SAP Activate methodology. In Detail It has been a general observation that most SAP consultants and professionals are used to the conventional waterfall methodology. Traditionally, this method has been there for ages and we all grew up learning about it and started practicing it in real world. The evolution of agile methodology has revolutionized the way we manage our projects and businesses. SAP Activate is an innovative, next generation business suite that allows producing working deliverables straight away. Manage your SAP Project with SAP Activate, will take your learning to the next level. The book promises to make you understand and practice the SAP Activate Framework. The focus is to take you on a journey of all the phases of SAP Activate methodology and make you understand all the phases with real time project examples. The author explains how SAP Activate methodology can be used through real-world use

cases, with a comprehensive discussion on Agile and Scrum, in the context of SAP Project. You will get familiar with SAP S4HANA which is an incredibly innovative platform for businesses which can store business data, interpret it, analyze it, process it in real time, and use it when it's needed depending upon the business requirement. Style and approach An easy to follow approach with concepts explained via scenarios and project examples

### **IBM Software for SAP Solutions**

This guide provides information for companies on how to plan and organize a SAP implementation. It includes examples of both new and existing SAP customer sites which offer tried and proven approaches, scripts and tools to save time and money.

### **SAP Billing and Revenue Innovation Management**

This book is about ecosystem mechanics and how to generate revenue through ecosystems and partnerships in the software industry. Topics include: economic foundations, value chains, business and partnering models as well as examples from Google, Microsoft, SAP, OpenSource among many others. Preface by Karl-Heinz Streibich, CEO of Software AG and Executive Member of BITKOM, the German Federal Association for IT, Tele-communications and New Media on "Software Clusters." Industry Comments: Thomas Koulopoulos, Founder and CEO of

Delphi Group, author of multiple bestselling books on IT and business trends, futurist, opinion leader [www.TKspeaks.com](http://www.TKspeaks.com) "Complexity and scale of the software industry is daunting. Partnering in this maze of players and relationships is like climbing Everest without a guide. This book is your GPS to the software ecosystem. Popp and Meyer did a great job distilling and explaining essential principles, such as the software industry value chain, many types of business models, and how all these can be leveraged to help your business grow and thrive. This book is a must read for anyone trying to navigate the chaos of the software landscape " Franz Baljer, President of the International Association for SAP Partners [www.ia4sp.org](http://www.ia4sp.org) and SAP Alliance Manager at T-Systems."This book helps people in our industry since it provides deep insight into partnering and alliance management. We are proud that knowledge and experiences of our members have contributed to this book."

### **SAP Solution Manager**

## **Monitoring and Operations with SAP Solution Manager**

"1st German edition published 2013 by Galileo Press, Bonn, Germany."

### **mySAP ERP For Dummies**

SAP S/4HANA is here, and the stakes are high. Get your project right with this guide to SAP Activate! Understand the road ahead: What are the phases of SAP Activate? Which activities happen when? Start by setting up a working system, then walk through guided configuration, and learn how to deploy SAP S/4HANA in your landscape: on-premise, cloud, or hybrid. Take advantage of SAP Activate's agile methodology, and get the guidance you need for a smooth and successful go-live! In this book, you'll learn about:

- Foundations** Get up to speed with SAP Activate. Learn about key concepts like fit-to-standard and fit/gap analysis, understand the methodology, and walk through the key phases of project management.
- Tools and Technologies** Open up your SAP Activate toolkit. See how to access SAP Activate content with SAP Best Practices Explorer, SAP Solution Manager, and more. Then, use SAP Best Practices and SAP Model Company to set up a working system for your workshops.
- Deployment** Deploy SAP S/4HANA, step by step. Follow detailed instructions to plan, prepare for, and execute your on-premise or cloud deployment activities according to SAP Activate. Walk through key scenarios for a hybrid implementation of SAP S/4HANA in your landscape.

Highlights Include: 1) Deployment 2) Guided configuration 3) Agile project delivery 4) SAP Best Practices 5) SAP Model Company 6) Organizational change management 7) SAP S/4HANA 8) SAP S/4HANA Cloud 9) Hybrid landscapes 10) C\_ACTIVATION05 certification

### **SAP HANA 2.0**

Whether you're upgrading an existing billing system or moving to a subscription- or consumption-based model, SAP BRIM is ready--and here's is your guide! From subscription order management and charging to invoicing and contract accounting, get step-by-step instructions for each piece of the billing puzzle. For setup, execution, or analytics, follow a continuous case study through each billing process. With this book, join the future of billing!

a. End-to-End Billing Learn the what and the why of SAP BRIM, and then master the how! Charging, invoicing, contract accounts receivable and payable, and subscription order management--see how to streamline billing with the SAP BRIM solutions.

b. Configuration and Functionality Set up and use SAP BRIM tools: Subscription Order Management, SAP Convergent Charging, SAP Convergent Invoicing, FI-CA, and more. Implement them individually or as part of an integrated landscape.

c. SAP BRIM in Action Meet Martex Corp., a fictional telecommunications case study and your guide through the SAP BRIM suite. Follow its path to subscription-based billing and learn from billing industry best practices!

1) SAP Billing and Revenue Innovation Management 2) Subscription

order management 3) SAP Convergent Charging 4) SAP Convergent Invoicing 5) Contracts accounting (FI-CA) 6) SAP Convergent Mediation 7) Reporting and analytics 8) Implementation 9) Project management

### **SAP, Next Generation**

This guide provides information for companies on how to plan and organize a SAP implementation. It includes examples of both new and existing SAP customer sites which offer tried and proven approaches, scripts and tools to save time and money.

### **The Architecture of SAP ERP**

Designed for SAP users as a quick reference or for computer science and business students, SAP MM Questions and Answers includes all the major concepts related to SAP MM functionality, technical configuration, and implementation in an easy-to-understand question and answer format. It discusses the new aspects related to SAP ERP 6.0 and all the important MM codes and concepts for materials and vendors, including clients, company codes, plants, storage locations, purchase organizations, etc. The organized and accessible format allows the reader to quickly find the questions on specific subjects and provides all of the details to pass certification exams in a step-by-step, easy-to-read method of instruction.

### **Configuring SAP ERP Sales and Distribution**

"Whether you're already en route to SAP S/4HANA or taking your first look, this book is your go-to introduction to the new suite. See what SAP S/4HANA offers for your core business processes: finance, manufacturing, sales, and more. Learn about your reporting, extension, and adoption options, and consult customer case studies to learn from current customers. From the cloud to SAP Leonardo, get on the cutting edge of SAP!"--

### **SAP Product Lifecycle Management**

SAP is a market leader in enterprise business application software. SAP solutions provide a rich set of composable application modules, and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite. In most cases, companies that adopt SAP software remain heterogeneous enterprises running both SAP and non-SAP systems to support their business processes. Regardless of the specific scenario, in heterogeneous enterprises most SAP implementations must be integrated with a variety of non-SAP enterprise systems: Portals Messaging infrastructure Business process management (BPM) tools Enterprise Content Management (ECM) methods and tools Business analytics (BA) and business intelligence (BI) technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP-centric environments. However, the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is

difficult and expensive to change and enhance. When SAP software is used in a large, heterogeneous enterprise environment, SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality, and to integrate the SAP solutions with non-SAP systems. This IBM® Redbooks® publication explains the value of integrating IBM software with SAP solutions. It describes how to enhance and extend pre-built capabilities in SAP software with best-in-class IBM enterprise software, enabling clients to maximize return on investment (ROI) in their SAP investment and achieve a balanced enterprise architecture approach. This book describes IBM Reference Architecture for SAP, a prescriptive blueprint for using IBM software in SAP solutions. The reference architecture is focused on defining the use of IBM software with SAP, and is not intended to address the internal aspects of SAP components. The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy, efficiency, and balance. The majority of the most important architectural domain topics, such as integration, process optimization, master data management, mobile access, Enterprise Content Management, business intelligence, DevOps, security, systems monitoring, and so on, are covered in the book. However, there are several other architectural domains which are not included in the book. This is not to imply that these other architectural domains are not important or are less important, or that IBM does not offer a solution to address them. It is only reflective of time constraints, available resources, and

the complexity of assembling a book on an extremely broad topic. Although more content could have been added, the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains, and it is hoped that this book provides great value to those reading it. This IBM Redbooks publication is targeted to the following audiences: Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large-scale SAP projects. IT architects and consultants integrating IBM technology with SAP solutions.

### **SAP Solution Manager for SAP S/4HANA**

This unique book helps administrators and IT managers to quickly understand the full functionality of SAP Solution Manager, release 4.0. Readers get a thorough introduction in the areas of Implementation and Operations, especially in the scenarios Project Management, Service Desk, Change Request Management, and the brand new function Diagnostics (root cause analysis). The integration capabilities with third-party tools from the areas of Help Desk and Modelling, as well as the relation between the functionality and ITIL Application Management are also dealt with in detail. The book is based on the latest information derived from the ramp-up experience of release 4.0, and makes extensive use

of invaluable customer success stories. Highlights include: - SAP Solution Manager and ITIL - Support in the Application Management Phases - End-to-End Solution Support - Change Request Management - Solution Monitoring and Reporting - Solution Manager Diagnostics (Root Cause Analysis) - Issue Management and Service Desk - Roadmaps and Implementation Content - Test Support and E-Learning Management - Planning and Delivery of SAP Services - Integration of Third Party Tools

### **IT Business Management: Solutions from SAP - A Pocket Guide**

The goal of this text is to describe the technical design aspects of the IT infrastructure; it does not give the details of installing and customizing SAP software, nor business process reengineering. Using primarily HP products for the solution examples, the chapters guide the reader through the foundation of the systems from an IT perspective, reviews its business application and architecture and introduces the server systems, then describes data storage, high availability and recovery solutions, client PCs with front-end user interfaces, output management and printing solutions, network infrastructure and requirements, cabling designs, LANs and WANs, and connecting mySAP.com to the Internet. Both authors are members of the HP-SAP International Competence Center. Annotation copyrighted by Book News, Inc., Portland, OR

### **IBM Software for SAP Solutions**

Following the HERUG conference of 2013, this collection of invited contributions of experts in their respective fields presents sharp opinions on key topics of the moment. The themes were selected by specialists working in universities from all over the world and dives into various issues related to the management of SAP projects and the SAP environment. The diversity of the participants and their experiences covers a wide range of problematic issues; namely, to help establish an SAP strategy, to improve the knowledge of SAP project parameters, to establish an information systems governance, and to illuminate institutional choices for solutions and the implementation of SAP.
