Are you making the jump from doing to leading?? John Stuef has been there, he was a successful doer who made the transition to leading. The thing about leadership is that it forces you to grow personally and to appreciate that inspiring people to do a job well requires a whole different skill set than doing that job yourself. In "From Doing To Leading," authors John Stuef and Amy Bradshaw show us the pitfalls of "traditional" leadership techniques, from the dictates of tough love, to keeping employees on a tight leash, to micro-managing all operations; these methods are flawed and counter-productive to a team. Leadership on the front-lines, in blue collar jobs, is no different than any other type

of workplace because all people are driven by the same brain chemistry - it's the basis of human nature. To understand people, we need to turn to the science of how the brain works. Understanding human behavior is the key to understanding how to lead. Good leaders dare to trust their employees. They harness the power of the neurochemical dopamine to inspire accomplishable goals and to motivate their team. They rewire a workplace into a true team environment, utilizing the bonding power of oxytocin. And they work hard against a team fueled by the release of cortisol, the debilitating "fight or flight" stress hormone that many frontline workers are drowning under without even realizing it. This is a book for the doers, body shop technicians, service advisors, front-line makers, manufacturers, and craftsmen who have arrived at that next stage of their career life: leadership. After reading "From Doing To leading," you'll know exactly what to do and not to do as you transition from being a doer to being a leader. Stuef and Bradshaw's winning combination of pragmatic advice, shared experience, and smart explorations of the brain science around motivation will set you on a straight path to winning leadership.

"Put together today's two most important technologies--wireless and the Internet--and what do you get? "Mobile technology"--and a whole new way to do business. And businesspeople are full of questions, such as: * How can I apply mobile technologies to my business? * How can mobile personal information management systems give my company a competitive edge? * What products and services are currently available and what's coming? In the spirit of AMACOM's The E-Commerce Question and Answer Book, Schneiderman provides compelling answers in an easy-look-up Q & A format. This informative book starts at the beginning and covers every angle, including: definitions of mobile technology and m-commerce terms and acronyms * key technologies * regulatory issues * applications * service providers * security and privacy issues * limitations of mobile info-tech * the future outlook. Cell phones and PDAs are everywhere, but that's only the beginning! This book shows readers how to apply mobile technology to their business--and significantly shorten time-to-market in this new fast-paced mobile age."

Nick Nurse distills the wisdom, insight, and experiences that helped him lead the Toronto Raptors to the NBA championship in his first year as head coach. Foreword by Phil Jackson. NBA fans had modest expectations for rookie coach Nick Nurse and his Toronto Raptors. But what those naysayers didn't realize was that Nurse had spent the past thirty years proving himself at every level of the game, from youth programs and college ball to the NBA D League and Britain's struggling pro circuit. While few coaches have taken such a circuitous path to pro basketball's promised land, the journey-which began at Kuemper Catholic high school in Carroll, Iowa-forged a coach who proved to be as unshakable as he is personable. On the road, he is known to bring his guitar and keyboard for late-night jazz and blues sessions. In the locker room, he's steadfast and even-keeled regardless of the score. On the court, he pulls out old-school tactics with astounding success. A rookie in name but a veteran in attitude, Nurse is seemingly above the chaos of the game and, with only two seasons on his résumé, has already established himself as one of the NBA's most admired head coaches. Now, in this revealing new book-equal parts personal memoir, leadership manifesto, and philosophical meditation-Nurse tells his own story. Given unprecedented access inside the Raptors' locker room, readers get an intimate study of not only the team culture he has built, but also of a rookie coach's unique dynamic with the star players-such as Kawhi Leonard, Kyle Lowry, and Pascal Siakam-who helped trailblaze the 2019 championship run. As much for readers of Ray Dalio as for fans of John Wooden and Pat Summitt, Rapture promises to be a necessary read for anyone looking to forge their own path to success.

Search has changed dramatically over the past decade. Gone are the days when stuffing a few extra keywords and hiring your 16-year-old nephew to produce content was all that was needed to propel a webpage to rank number one on Google. Today, search engine algorithms are "smarter" than ever, not only capable of understanding what a website is all about, but also at detecting questionable optimization techniques. If your site is found guilty of doing the latter, the penalties imposed can be devastating. The importance of search engine rankings helped launch the search engine optimization industry, along with a sub-culture of self-appointed "SEO experts" toting bags full of tricks such as hidden text, doorway pages, cloaking, duplicate content, link wheels, and more. Search engines continually upgrade their algorithms to fight dirty SEO tricks, punishing websites that bend the rules, while rewarding websites that make quality contributions through great content and value. Snake E-Oil: The SEO Swindle is written in plain English focusing on topics important to you, the website owner.

- Learn what's behind SEO and SEM
- How to avoid penalties and all the associated headaches
- Uncover "Google's First Page" myth
- Learn what works, and what doesn't
- How to deal with SEO "experts"
- What are on-page, off-page, and negative SEO

And more! If you own a website or a web store, this book is for you!

The Survival Guide to Maputo

From Doing to Leading

Yahoo's lead baseball columnist offers an in-depth look at the most valuable commodity in sports—the pitching arm—and how its vulnerability to injury is hurting players and the game, from Little League to the majors. Every year, Major League Baseball spends more than \$1.5 billion on pitchers—five times more than the salary of every NFL quarterback combined. Pitchers are the game's lifeblood. Their import is exceeded only by their fragility. One tiny band of tissue in the elbow, the ulnar collateral ligament, is snapping at unprecedented rates, leaving current big league players vulnerable and the coming generation of baseball-playing children dreading the three scariest words in the sport: Tommy John surgery. Jeff Passan traveled the world for three years to explore in-depth the past,

present, and future of the arm, and how its evolution left baseball struggling to wrangle its Tommy John surgery epidemic. He examined what compelled the Chicago Cubs to spend \$155 million on one arm. He snagged a rare interview with Sandy Koufax, whose career was cut short by injury at thirty, and visited Japan to understand how another baseball-mad country treats its prized arms. And he followed two major league pitchers, Daniel Hudson and Todd Coffey, throughout their returns from Tommy John surgery. He exposes how the baseball establishment long ignored the rise in arm injuries and reveals how misplaced incentives across the sport stifle potential changes. Injuries to the UCL start as early as Little League. Without a drastic cultural shift, baseball will continue to lose hundreds of millions of dollars annually to damaged pitchers, and another generation of children will suffer the same problems that vex current players. Informative and hard-hitting, *The Arm* is essential reading for everyone who loves the game, wants to keep their children healthy, or relishes a look into how a large, complex institution can fail so spectacularly.
