Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're

inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

From the single-cylinder bikes of the 1950s to the high-performance sportbikes of today, *The Complete Book of Ducati Motorcycles* showcases the entire spectrum of Ducati. Legendary Ducati motorcycles have something of a rags-to-riches story. This Italian motorcycle manufacturer began by selling motorized bicycles to impoverished residents of post-World War II Italy. Today, Ducati is the world's premier manufacturer of street motorcycles whose sales continue to rise year after year. Its svelte, hyper-accelerating motorcycles are two-wheeled wonders that are fluent in the language of speed. *The Complete Book of Ducati Motorcycles* traces the stunning chronology of the motorcycles dreamed up by Ducati, from the 1950s to present day. Laid out for the first time in encyclopedia form with gorgeous photography and insights from Ducati expert Ian Falloon, this book offers

motorcycle enthusiasts a closer look at the craftsmanship, power, and beauty of these extraordinary motorcycles. The book features all of the motorcycles from Ducati's storied history, including the groundbreaking Desmodromic 750 Super Sport, the Mike Hailwood Replica, the Superbike-dominating 916, and the epic Panigale. From the street bikes that gave birth to the very notion of the modern superbike to the racing motorcycles that dominated tracks in Great Britain, Europe, and North America since the latter part of the twentieth century, The Complete Book of Ducati Motorcycles runs the full gamut of sportbikes. It's a collection that demands shelf space in the library of any true motorcycle collector or fan.

WALNECK'S CLASSIC CYCLE TRADER, AUGUST 2004

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the

development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

This is the most complete account ever written of racing with the Kawasaki USA team in the years between 1967 and 1978, It is also the most authentic, as it is written by the man who was the company racing manager and a development engineer on the racing motorcycles from 1971 through 1983. The full story of the Kawasaki racing effort is the subject of this 344 page book, with full details of the machines and the men who raced them with great success in the Formula 750cc class in both the USA and Europe. Many anecdotes and reminiscences by the author are joined with his memories of the riders and the races contested as well as in-depth technical details of the development and preparation of the machines. There are well over 100 photographs by leading motorcycle photographers , including superb full-colour studio pictures and rare archive material from back in the day..

Abby Steele hadn't seen the inside of her own apartment in over three years. Life on the road kept her busy and building the business took all of her focus. Steel Journeys was a company she had founded all on her own. She wanted other women to experience what she had seen, felt, heard, smelled, and tasted. That was the dream-to form a women's motorcycle touring company, and to take it global. Three years was a long time to be away, but home was just a concept. It couldn't be defined by the four walls of any structure. Home was her saddle. Home was the wind in her face and the vibration under her seat. Home might be a Harley, a BMW, a Triumph, a Honda—Home was whatever bike fit the terrain. Home was the road. Abby was part riding instructor, part tour guide and part life coach. She cared about the women on her tours, and they respected her for it. It took a lot of miles to work through the hurts of her past, but finally she had built a life she could be proud of - until an unexpected visitor threatens to bring all the blocks tumbling down. Join Abby on the road to Patagonia, and reconnect with your own inner adventurer!
