## **Jane's World Railways**

The story of the ZR-1 Corvette and the high-performance LT5 engine is a fascinating tale of interest to every Corvette enthusiast. The author gives you an inside look at how the ZR-1 was born, what went into the design and manufacture of the LT5 engine, and why production was discontinued. THE HEART OF THE BEAST also discusses the exciting American and European debuts of the ZR-1, the numerous world records set by this potent Corvette, and the various aftermarket variations of the ZR-1.

Beginning in 1985, one section is devoted to a special topic

### **Steel and Iron**

### **Corvette Chronicle**

For nearly sixty years, TVR produced some of the most thrilling, spine-tingling, hand-built sports cars to emerge from any British motor manufacturer. Yet it was the period between 1981 and 2004, under the management of Peter Wheeler, when the company finally shook off its shed-built roots and proved that it could produce cars that could match anything from Maranello or Stuttgart in terms of performance, but at a fraction of their price. Illustrated with over 300 photographs, TVR - Cars of the Peter Wheeler Era tells the story of the design, development and engineering of some of TVR's fastest, outrageous and most successful cars, from the retro-styled S1, to the racing Tuscan, 1000bhp Speed Twelve and the brutal Sagaris.
